How to Use This Document

This document holds the complete website copy for digicarotene.com, written to rank on Google in Hyderabad and Bangalore, to be quoted by AI answer engines (ChatGPT, Gemini, Perplexity, Google AI Overviews), and to double as source material for paid campaigns.

Every page follows the same structure so the web developer can drop it straight into the CMS:

- Page settings: URL slug, meta title (under 60 characters), meta description (under 160 characters), primary and secondary keywords, and the schema type to implement.
- Heading tags are marked inline as [H1], [H2] and [H3]. Each page has exactly one H1. Never skip a level (no H3 directly under the H1).
- Text without a tag is body copy (<p>). Bulleted lines are lists.
- FAQ blocks are written answer-first in 40 to 70 words, which is the length AI engines and Google's featured snippets prefer to lift. Wrap every FAQ block in FAQPage JSON-LD.
- The Paid Media Kit at the end of each page gives Google Ads responsive search ad headlines (30 characters max), descriptions (90 characters max), and Meta ad copy. These are character-checked. Landing-page message match is built in: the ad promise is the H1 promise.
- Anything in [square brackets] is a placeholder for a fact only Digi Carotene can supply. Do not publish placeholders. Do not replace them with guesses.

Market figures quoted on pages are sourced in the appendix. Re-check any figure older than 12 months before go-live and update the year.

Brand Analysis: What the Current Site Says vs What It Should Say

H2 What is working

- The AEO and GEO positioning is a genuine differentiator. Very few agencies in Hyderabad or Bangalore talk credibly about being cited by AI answer engines.
- The online + offline + PR offer is rare. Most competitors do digital only, or events only. "One accountable team" is a real reason to choose Digi Carotene.
- The name story ("Carotene is a pigment. Warm, concentrated, used with intent") is memorable and should stay.

H2 What is holding the site back

- The core promise is missing. The brief says Digi Carotene is a results-driven agency where decisions are taken on data, with 7+ years of experience and 300+ clients across the globe. None of those proof points appear anywhere on the current site.
- The language is written for other marketers, not for buyers. Phrases like "semantic nodes", "zero-leak paths", "crawl-budget and latency auditing" and "brand-governed authority" impress nobody who is deciding whether to sign a retainer. A restaurant owner in Kondapur or a SaaS founder in HSR Layout needs to hear what changes for their business.
- There is no proof. Case studies are placeholders, and the SEO page shows a "+280%" KPI that is not attached to any client. Unverified numbers damage trust and can attract complaints. Remove them until real numbers replace them.
- "Premium brands only" positioning narrows the funnel. Digi Carotene's actual client base includes restaurants, salons, clinics, education and B2B companies. The copy below speaks to ambitious businesses of every size, with a premium standard of work.
- No city targeting. Hyderabad appears only in the footer, Bangalore does not appear at all, and some pages say Dubai. Google cannot rank a site for a city it is not clearly about.

H2 Recommended positioning

Positioning statement: Digi Carotene is a data-led, results-first marketing agency from Hyderabad, serving Hyderabad, Bangalore and clients across the globe. For 7+ years and 300+ clients, we have helped brands get found on Google, recommended by AI, and chosen in the real world, and we measure our work in leads, footfall and revenue, not likes.

Primary tagline: Found. Chosen. Measured.

Alternate lines for ads and social: "Marketing that answers to data." / "Every rupee, accounted for." / "Less guessing. More growing."

H3 The four message pillars (use these across every page)

- Data decides. Every recommendation comes with the number behind it. Clients see the same dashboard we do.

- Found everywhere. On Google, inside AI answers, on Instagram, and in the mall, the metro and the society clubhouse.
- One accountable team. Strategy, creative, media, tech, on-ground and PR under one roof and one report.
- Local depth, global experience. Rooted in Hyderabad, active in Bangalore, trusted by 300+ clients across the globe over 7+ years.

H3 Voice rules for every writer

- Say it plainly. If a ten-year-old could not repeat the sentence back, rewrite it.
- Show the number. Replace adjectives with metrics wherever a metric exists.
- Talk like a partner, not a vendor. "We" and "you", short sentences, no hype words (no "revolutionary", "synergy", "world-class").
- Be honest about what marketing can and cannot do. Promise process and transparency; never promise guaranteed rankings or guaranteed ROI.

Keyword and Local SEO Strategy for Hyderabad and Bangalore

H2 How the site will rank in two cities

Google ranks a page for a city when the page is clearly about that city, the business has a verified presence there, and other trusted sites connect the business to that city. The copy handles the first part. The rest needs action outside the CMS.

- City hub pages: Two new pages (Digital Marketing Agency in Hyderabad, Digital Marketing Agency in Bangalore) are included in this document. They are the main targets for the high-volume "agency + city" searches and they link down to every service page.
- Service pages: Each service page names both cities in the meta title or description and has a short "In Hyderabad and Bengaluru" section, so it can rank for "[service] in Hyderabad" and "[service] in Bangalore" without stuffing.
- Use both spellings. People search "Bangalore" more than "Bengaluru" but AI engines and newer listings use "Bengaluru". The copy uses both naturally.
- Google Business Profile: Hyderabad needs a verified profile with the exact same name, address and phone (NAP) as the website footer. [Important] Ranking in the Bangalore map pack requires a real, staffed Bangalore address. If Digi Carotene does not have one, the Bangalore city page can still rank organically, but do not create a virtual-office listing; Google suspends these.
- Citations and mentions: List the agency on Clutch, GoodFirms, DesignRush, Sortlist and Justdial with identical NAP. AI engines lean heavily on these directories when answering "best agency in [city]" questions.
- Reviews: Ask every satisfied client for a Google review that mentions the service and city in their own words (for example, "they ran our Meta ads for our Gachibowli clinic"). Never script or incentivise reviews.

H2 Core keyword clusters

- Agency cluster: digital marketing agency in Hyderabad, digital marketing company in Hyderabad, best digital marketing agency Hyderabad, digital marketing agency in Bangalore, digital marketing company Bengaluru, marketing agency near me.
- Search cluster: SEO company in Hyderabad, SEO services Bangalore, local SEO services, AEO agency India, generative engine optimization services, AI search optimization.
- Paid cluster: performance marketing agency Hyderabad, Google Ads agency Bangalore, Meta ads agency Hyderabad, PPC company in Hyderabad, lead generation agency Bangalore.
- Social and content cluster: social media marketing agency Hyderabad, social media agency Bangalore, content marketing agency, Instagram reels shoot Hyderabad, personal branding agency Bangalore.
- Web cluster: website design company in Hyderabad, web development company Bangalore, SEO-friendly website design.
- Offline cluster: BTL activation agency Hyderabad, mall activation agency Bangalore, society activation Hyderabad, college activation agency, cinema advertising Hyderabad, metro advertising Hyderabad, Namma Metro advertising, corporate event management Hyderabad, pop-up store agency, influencer marketing agency Hyderabad.

- PR cluster: PR agency in Hyderabad, PR agency Bangalore, startup PR agency, online reputation management Hyderabad.

H2 AEO and GEO rules built into the copy

- Answer first. Every "What is" section starts with a one-sentence definition that can be quoted on its own.
- Name the entity. Pages say "Digi Carotene, a data-led marketing agency based in Hyderabad" in full at least once, so AI engines can attach facts to the brand.
- Use real questions. FAQs are phrased the way people type and speak them to ChatGPT and Google.
- Keep facts consistent. The same founding experience (7+ years), client count (300+), city and services must appear identically on the website, LinkedIn, Google Business Profile and directories. Inconsistency is the number one reason AI engines skip a brand.
- Publish an llms.txt file at the root summarising who Digi Carotene is, what it does, where, and the key page URLs.

H1

The Data-Led Digital Marketing Agency for Hyderabad and Bangalore

For 7+ years and 300+ clients across the globe, we have done one thing well: turn marketing spend into results you can count. We get you found on Google, recommended by AI, and chosen in the real world, and we show you the numbers every step of the way.

BUTTONS: [Get a Free Growth Audit](#) [[See What We Do](#)]

TRUST STRIP (below hero)

7+ years in business · 300+ clients served · Hyderabad, Bangalore and global clients · Online, offline and PR under one roof

H2

Your customers stopped scrolling through ten blue links

Here is what changed. People now ask ChatGPT, Gemini and Google's AI Overviews for answers, and they often get one without clicking anything. India alone has around 100 million weekly ChatGPT users. A 2026 field study found that when Google shows an AI Overview, clicks to websites drop by roughly 40%.

So if your marketing still runs on 2019 rules, more ads and more posts, you are paying more to be seen by fewer people. The brands winning today are the ones being named in the answer, showing up in the feed at the right moment, and standing in front of customers where they shop, commute and celebrate.

That is the job we do.

H2

What makes Digi Carotene different

H3

We decide with data, not hunches

Every campaign starts with a baseline and ends with a report you can understand. We track cost per lead, cost per acquisition, return on ad spend, footfall and revenue, not vanity metrics. When something is not working, we tell you first and fix it fast.

H3 We make you visible where people actually look now

Google search, Google Maps, AI answer engines, Instagram, YouTube, WhatsApp, malls, metro stations, campuses and gated communities. We plan them as one system so every touchpoint pushes the same customer towards the same decision.

H3 One team, one plan, one report

Strategists, performance marketers, designers, developers, content writers, a production crew and an on-ground activation team, all working off the same brief. No vendor ping-pong. No finger pointing.

H3 Hyderabad roots, Bangalore reach, global experience

We know how a Jubilee Hills diner decides differently from a Whitefield techie. And after 300+ clients across industries and countries, we know which playbooks travel and which ones do not.

H2 Our services

H3 Search and AI Discovery

SEO, Answer Engine Optimization (AEO) and Generative Engine Optimization (GEO) so you rank on Google and get recommended by ChatGPT, Gemini and Perplexity.

H3 Performance and Growth Marketing

Google Ads, Meta Ads and full-funnel growth experiments built around one number: what it costs to win a customer.

H3 Content, Social and Creative

Content marketing, social media management, graphic design, Instagram shoots and personal branding that people actually stop to watch.

H3 Websites that convert

Fast, SEO-ready websites and landing pages designed to turn visitors into enquiries.

H3 Offline and Experiential Marketing

Mall, residential, campus and festival activations, theatre and metro branding, pop-up stores, corporate events and influencer campaigns, all trackable back to digital.

H3 PR and Reputation

Media coverage, founder narratives and reputation management that also feed the sources AI engines trust.

BUTTONS: [Explore All Services](#)

H2 Who we work with

- Restaurants, cafes and cloud kitchens that need full tables and steady delivery orders.
- Clinics, hospitals and wellness brands that need patient enquiries, not just likes.
- Salons, fashion and lifestyle brands that live and die by Instagram.
- Schools, colleges and edtech that run admissions seasons on tight deadlines.
- Real estate, furniture and high-ticket retail where every lead is worth chasing.
- Founder-led startups, SaaS and B2B companies selling to Bangalore, Hyderabad and the world.

H2 How we work: Diagnose, Plan, Launch, Measure

H3 1. Diagnose

We audit where you show up today: Google rankings, AI answers, ads, social, website speed and local listings. You get a clear picture of where customers are slipping away.

H3 2. Plan

We set targets with you (leads, sales, footfall, cost per acquisition) and build a channel plan and budget split to hit them.

H3 3. Launch

Creative, campaigns, content and on-ground activations go live on an agreed calendar. Everything is tagged and tracked from day one.

H3 4. Measure and improve

Weekly checks, monthly reports and a live dashboard. We move budget towards what works and cut what does not.

H2 Results, not reports

NOTE (do not publish)

Developer and client: Replace this block with 3 real case study cards (client or anonymised industry, challenge, one headline metric, time frame). Example format below. Do not publish invented numbers.

- [Industry, City]: [Metric] in [time frame]. Example structure: "Multi-speciality clinic, Hyderabad: [X]% lower cost per patient enquiry in [Y] months."
- [Industry, City]: [Metric] in [time frame].
- [Industry, City]: [Metric] in [time frame].

H2 Frequently asked questions

H3 What does a digital marketing agency in Hyderabad do?

A digital marketing agency helps businesses win customers online through SEO, paid ads, social media, content and websites. Digi Carotene, a data-led agency based in Hyderabad, also covers AI search visibility, offline activations and PR, and reports every result against targets like cost per lead and revenue.

H3 What is AEO and GEO, and do I still need SEO?

AEO (Answer Engine Optimization) structures your content so AI assistants and Google's AI Overviews can quote it. GEO (Generative Engine Optimization) increases how often tools like ChatGPT and Perplexity mention your brand. You still need SEO, because AI engines mostly pull answers from pages that already rank and are trusted.

H3 Do you work with businesses in Bangalore?

Yes. Digi Carotene works with brands across Bangalore and Hyderabad, and with clients in other countries. Digital work is run remotely with regular reviews, and our on-ground team handles activations, shoots and events in both cities.

H3 How much does digital marketing cost in Hyderabad?

It depends on your goals, channels and ad budget. Agency fees are separate from ad spend. After a free audit, Digi Carotene shares a fixed-scope proposal with clear deliverables and the targets we will report against, so you know exactly what you are paying for.

H3 How soon will I see results?

Paid ads can generate leads within the first one to two weeks. SEO, AEO and content usually show measurable movement in three to six months. Offline activations deliver results on the day, and we track the follow-up conversions digitally.

H3 Do you only do digital marketing?

No. Alongside digital, Digi Carotene runs mall, residential, campus and festival activations, theatre and metro branding, pop-up stores, corporate events, influencer campaigns and PR, so online and offline marketing work as one plan.

EYEBROW LABEL (<p>, not a heading): ABOUT DIGI CAROTENE

H1

We Are Not Here to Make Marketing Look Busy. We Are Here to Make It Pay.

Digi Carotene is a data-led, results-first marketing agency based in Hyderabad. For more than seven years we have helped 300+ clients in Hyderabad, Bangalore and across the globe get found, get chosen and grow, with every decision backed by numbers.

BUTTONS: [Work With Us](#) [[Meet the Team](#)]

H2

Why we exist

Most businesses we meet have been burned before. They have paid for posts that nobody saw, ads that brought clicks but no customers, and reports full of words like "reach" and "impressions" that never explained where the money went.

We started Digi Carotene to fix that. Our rule is simple: if we cannot measure it, we do not sell it as a result. If a campaign is not working, you hear it from us first, along with what we are changing.

H2

Why the name Carotene

Carotene is a natural pigment. It is warm, concentrated and always there for a reason, never just decoration. That is how we think about marketing. Every rupee, every design and every word should be used with intent and should do a job you can see.

H2

What we believe

H3

Data decides

Opinions are welcome in brainstorm. Decisions are made on data: search demand, audience behaviour, cost per lead, conversion rates and sales. You see the same dashboard we do.

H3

Results over activity

Twenty posts a month is activity. Forty qualified enquiries a month is a result. We plan backwards from the result.

H3 Online and offline are one customer journey

Your customer sees a reel on the metro, walks past your kiosk at the mall, then asks ChatGPT which brand to trust. We plan for the whole journey, not one channel.

H3 Honest partnership

No guaranteed rankings, no fake reviews, no inflated numbers. Just clear goals, clear reporting and a team that picks up the phone.

H2 Digi Carotene in numbers

- 7+ years of building brands and campaigns.
- 300+ clients served across industries and countries.
- [Number] campaigns launched / [Number] activations executed / [Number] websites built. (Client to confirm before publishing.)
- Teams covering strategy, performance media, SEO and AEO, content, design, development, production, on-ground activations and PR.

H2 Where we work

Our home is Hyderabad, where we know every high-footfall corner from Hitech City to Dilsukhnagar. We also run campaigns for brands across Bangalore, from Koramangala startups to Whitefield retail, and serve clients in [list countries, e.g., the UAE, the US, the UK] remotely.

H2 Frequently asked questions

H3 Where is Digi Carotene based?

Digi Carotene is headquartered in Hyderabad, Telangana, India. The agency serves clients across Hyderabad and Bangalore with on-ground teams for shoots, activations and events, and works remotely with clients in other countries.

H3 How long has Digi Carotene been in business?

Digi Carotene has more than seven years of experience in digital and offline marketing and has worked with over 300 clients across industries such as hospitality, healthcare, retail, education, real estate and B2B technology.

H3 What makes Digi Carotene different from other agencies?

Three things: every decision is backed by data and reported in business terms like leads and revenue; the agency covers online, AI search, offline activations and PR under one team; and it combines local knowledge of Hyderabad and Bangalore with experience from 300+ clients globally.

EYEBROW LABEL (<p>, not a heading): OUR TEAM

H1

The People Behind the Numbers

Great marketing is part science and part craft. Our team brings both: analysts who live in spreadsheets, creatives who live in Figma and on set, and an on-ground crew that knows how to make a crowd stop and look.

H2

Leadership

NOTE (do not publish)

For each leader, add photo, full name, title, years of experience, one-line specialism and LinkedIn link. Real names and LinkedIn profiles strengthen E-E-A-T for Google and help AI engines verify the brand.

- [Name], Founder and [Title]: [One line on expertise, e.g., "Has led campaigns for 300+ brands across hospitality, healthcare and tech."]
- [Name], [Title]: [One line]
- [Name], [Title]: [One line]

H2

How our team is organised

H3

Strategy and Account Management

Your single point of contact. They own your targets, run reviews and make sure every team is working to the same plan.

H3

Performance Marketing and Analytics

Google Ads, Meta Ads and tracking specialists who watch cost per lead and return on ad spend daily, not monthly.

H3

Search, AEO and Content

SEO specialists and writers who make your brand rank on Google and get quoted by AI answer engines.

H3

Creative and Design

Designers, video editors and copywriters who turn strategy into scroll-stopping work.

H3 Web and Technology

Developers who build fast, SEO-ready websites, landing pages, WhatsApp and CRM automations.

H3 Production

Photographers and videographers who handle Instagram shoots, brand films and event coverage.

H3 On-Ground Activations and PR

The crew that runs mall, campus, residential and festival activations across Hyderabad and Bangalore, plus media relations.

H2 Want to join us?

We hire curious people who like numbers and stories equally. Send your portfolio to [\[careers email\]](#).

NOTE (do not publish)

Writer and founder: This is a framework built on the brand's core belief. Replace bracketed parts with the founder's real story. Real, specific details (a first client, a mistake, a turning point) are what make this page credible to readers and to AI engines.

H2

The problem I kept seeing

Before Digi Carotene, I [founder's background, e.g., worked in sales / ran campaigns for an agency / ran my own business]. Again and again I met business owners who had spent real money on marketing and could not answer one basic question: what did it bring back?

They had beautiful posts. They had reports full of "impressions". What they did not have was a clear line from spend to customers.

H2

The first client

[Tell the story of the first client: who they were (or the industry), what they were struggling with, what you did differently, and the result. Keep it to 4 to 6 sentences.]

That project taught me the rule we still run on: start with the number that matters to the business, and work backwards.

H2

Building Digi Carotene

Over the next seven years, that rule turned into an agency. We added SEO, then performance marketing, then production, web development and on-ground activations, because our clients' customers were not living in one channel, so neither could we.

Today we have worked with 300+ clients, from neighbourhood restaurants in Hyderabad to [example of a larger or international client type]. The tools have changed. AI search did not exist when we started. The question has not changed: where did the money go, and what did it bring back?

H2 What I promise every client

- I will never sell you a metric that does not matter to your business.
- If something is not working, you will hear it from us before you notice it.
- Your growth is the only scoreboard we care about.

[Founder name], Founder, Digi Carotene

H1

300+ Clients. One Thing in Common: They Wanted Proof.

From neighbourhood favourites to fast-growing startups and international brands, our clients came to us for the same reason. They wanted marketing they could measure.

H2

Brands we have worked with

NOTE (do not publish)

Add client logos (with written permission) in a grid. Use descriptive alt text, e.g., "[Brand name] logo, restaurant client in Hyderabad". Remove the "Client 01 to Client 08" placeholders currently live on the homepage.

H2

Industries we know inside out

H3

Restaurants, Cafes and QSR

Zomato and Swiggy visibility, Google Maps rankings, reels that make people hungry and offers that fill tables on slow weekdays.

H3

Healthcare and Wellness

Patient-first content, compliant ads and local SEO for clinics, hospitals, dermatology, dental and nutrition brands.

H3

Salons, Beauty and Fashion

Instagram-led growth, bridal season campaigns, influencer collaborations and booking funnels.

H3

Education

Admission campaigns, counselling-lead funnels, campus activations and parent-trust content for schools, colleges and edtech.

H3

Real Estate, Furniture and Home

High-ticket lead generation, site-visit campaigns, residential activations and showroom footfall.

H3 Technology and B2B

LinkedIn, founder branding, account-based campaigns, PR and AI search visibility for SaaS and service companies.

H2 What our clients say

NOTE (do not publish)

Add 4 to 6 genuine testimonials with name, designation, company and city. Video testimonials are best. Only mark up with Review schema if the review is genuine and shown on the page.

EYEBROW LABEL (<p>, not a heading): DIGITAL MARKETING SERVICES

H1

Digital Marketing Services That Report in Revenue, Not Reach

Search, ads, social, content and your website are not separate jobs. They are one machine for winning customers. We build and run that machine for brands in Hyderabad, Bangalore and around the world, and we report it in the numbers your business runs on.

BUTTONS: [Get a Free Digital Audit](#) [[Talk to a Strategist](#)]

H2

More channels than ever. Less patience than ever.

Digital now takes the biggest share of advertising money in India, close to 60% of all ad spend in 2025 and rising. That means more competition for the same eyeballs, higher costs per click, and buyers who decide faster. Doing a bit of everything no longer works. You need the right channels, connected, and measured against one goal.

H2

What is a full-service digital marketing agency?

A full-service digital marketing agency plans, creates and runs all of a brand's online marketing (SEO, paid ads, social media, content, website and email) as one connected strategy. At Digi Carotene, every channel is tracked against shared targets such as cost per lead, customer acquisition cost and revenue.

H2

Our digital marketing services

H3

Performance Marketing

Google, Meta, LinkedIn and YouTube ads engineered around cost per lead and return on ad spend.

H3

Growth Marketing

Full-funnel experiments, CRO and retention loops that compound growth month after month.

H3

Search Engine Optimization (SEO, AEO and GEO)

Rank on Google, win Google Maps, and get recommended by ChatGPT, Gemini and Perplexity.

H3 Content Marketing

Blogs, guides, videos and answer-ready content that builds trust and search visibility.

H3 Social Media Marketing

Platform-native content, community management and paid social that turns followers into customers.

H3 Graphic Designing

Brand identities, campaign creatives, packaging and ad designs built to be noticed and remembered.

H3 Web Design and Development

Fast, mobile-first, SEO-ready websites and landing pages built to convert.

H3 Personal Branding

LinkedIn and Instagram presence for founders and leaders who want to become the name people trust.

H3 Email and WhatsApp Marketing

Automated journeys that bring customers back, using the channels Indians actually open.

H3 Insta Shoot

On-location photo and reel production made for the Instagram feed, not the billboard.

H2 How our digital work is different

- One strategy, many channels. SEO, ads and social share keywords, audiences and creative learning, so each makes the others cheaper.
- Tracking before spending. We set up GA4, conversion tracking, Meta Pixel and CAPI, call tracking and CRM integration before the first rupee goes live.
- Weekly optimisation, monthly clarity. We adjust budgets and creative every week and send one plain-English monthly report.
- AI-era ready. Every content asset is written to rank on Google and to be quoted by AI answer engines.

H2 Digital marketing in Hyderabad and Bengaluru

Hyderabad and Bangalore are two of India's most competitive digital markets, with dense IT corridors, high smartphone usage and buyers who compare everything. A Gachibowli professional and a Banjara Hills family respond to different offers, platforms and times of day. So do a Koramangala founder and a Jayanagar homemaker. We plan city by city, and often neighbourhood by neighbourhood.

H2 Frequently asked questions

H3 Which digital marketing service should I start with?

Start with the channel closest to a purchase. For most local businesses that is Google Business Profile, search ads and Meta ads. For B2B, it is SEO, LinkedIn and founder branding. Digi Carotene's free audit identifies the fastest path to results for your business and budget.

H3 How do you measure digital marketing results?

We agree on business targets first, such as leads, bookings, sales or cost per acquisition. Then we track them through GA4, ad platform conversions, call tracking and your CRM. You get a live dashboard and a monthly report that explains what happened and what we will change.

H3 Is ad spend included in your fees?

No. Agency fees cover strategy, creative, management and reporting. Ad spend is paid directly to Google, Meta or other platforms from your account, so you keep full ownership and transparency of every rupee.

EYEBROW LABEL (<p>, not a heading): PERFORMANCE MARKETING

H1

You Don't Have an Ad Problem. You Have a Math Problem.

Clicks are cheap. Customers are not. Our performance marketing team runs Google, Meta, YouTube and LinkedIn ads around the only numbers that matter: what each lead costs, what each customer costs, and what comes back for every rupee you spend.

BUTTONS: [Get a Free Ad Account Audit](#) [[See How We Work](#)]

H2

Why most ad budgets leak

We audit a lot of ad accounts. The same problems show up again and again: conversion tracking that counts page views as leads, broad campaigns showing ads to people who will never buy, one tired creative running for months, and nobody calling the leads back within the hour. The platform keeps spending. The business keeps wondering why sales have not moved.

Performance marketing fixes the math, not just the ads.

H2

What is performance marketing?

Performance marketing is paid advertising that is planned, optimised and paid for against measurable outcomes such as leads, sales, app installs or bookings, rather than impressions. It runs on platforms like Google Ads, Meta (Facebook and Instagram), YouTube and LinkedIn, with success measured by cost per acquisition (CPA) and return on ad spend (ROAS).

H2 What we manage

H3 Google Ads (Search, Performance Max, Display, YouTube)

Capture people already searching for what you sell, from "dermatologist near me" to "ERP software for manufacturing". High-intent keywords, tight ad groups, negative keyword hygiene and landing pages that match the promise.

H3 Meta Ads (Facebook and Instagram)

Create demand with reels, carousels and lead forms targeted by interest, behaviour, location and lookalike audiences. Ideal for restaurants, fashion, beauty, real estate, education and D2C.

H3 LinkedIn Ads

Reach decision-makers by job title, company size and industry for B2B, SaaS and recruitment campaigns.

H3 WhatsApp-led campaigns

Click-to-WhatsApp ads that start a conversation instead of a form, often the fastest-converting format for Indian buyers.

H3 Tracking and attribution

GA4, Google Tag Manager, Meta Pixel and Conversions API, offline conversion uploads and call tracking, so we optimise for real customers, not just form fills.

H2 Our performance marketing process

H3 1. Audit and baseline

We audit your account, tracking and funnel, then set a baseline for cost per lead, conversion rate and ROAS.

H3 2. Unit economics

We work out what a customer is worth to you and what you can afford to pay for one. That number sets every bid and budget.

H3 3. Build and launch

Campaign structure, audiences, ad copy, creatives and landing pages built to match each stage of intent.

H3 4. Test and scale

Structured A/B tests on creative, offer and audience every week. Budget moves to the winners. Losers are paused fast.

H3 5. Close the loop

We connect ad data to your CRM or sales sheet so we can see which campaigns bring paying customers, then optimise for those.

H2 Who it works best for

- Clinics, hospitals and diagnostics centres that need patient enquiries.
- Restaurants, cafes and cloud kitchens driving reservations and direct orders.
- Real estate developers and furniture brands generating site visits and showroom walk-ins.

- Colleges and edtech running admission seasons.
- D2C and e-commerce brands focused on ROAS.
- B2B and SaaS companies chasing qualified demos.

H2 Performance marketing in Hyderabad and Bangalore

Search costs vary sharply by city and neighbourhood. Bidding for "best dentist in Bangalore" is not the same as "dentist in Kondapur". We use radius and pin-code targeting, local ad extensions and city-specific creatives to stop paying for people outside your delivery or service area, whether that is Kukatpally, Madhapur, HSR Layout or Whitefield.

H2 Why brands choose Digi Carotene for paid ads

- 7+ years running ads for 300+ clients across categories, so we know realistic benchmarks for your industry.
- Ads and landing pages built by one team, so the message matches.
- You own your ad accounts and data. Always.
- A weekly snapshot and a monthly report in plain English: spend, leads, cost per lead, customers, revenue.

H2 Frequently asked questions

H3 What is a good ROAS for Google or Meta ads in India?

It depends on margins. A business with 60% margins can grow profitably at a 2x return on ad spend, while a thin-margin retailer may need 5x or more. Digi Carotene calculates your break-even ROAS and target cost per acquisition before launching, so every campaign is judged against your real economics.

H3 What is the minimum ad budget you recommend?

For local lead generation in Hyderabad or Bangalore, most businesses need enough budget to get at least 30 to 50 conversions a month so the platforms can optimise. We suggest a starting budget after the audit, based on your industry's typical cost per lead.

H3 Google Ads or Meta Ads: which is better for my business?

Google Ads captures people already searching for your service, so it suits high-intent needs like clinics, repairs and B2B. Meta Ads creates demand through visuals and targeting, so it suits food, fashion, beauty, real estate and events. Most growing businesses use both, with budget shifted by results.

H3 How fast will performance marketing show results?

Leads usually start within the first week. The first two to four weeks are a learning phase where we test audiences and creatives. Cost per lead typically stabilises and improves from the second month onwards.

EYEBROW LABEL (<p>, not a heading): GROWTH MARKETING

H1

Growth Isn't a Campaign. It's a Habit of Testing.

Performance marketing buys you customers. Growth marketing makes every customer cheaper to win, more likely to buy again and more likely to bring a friend. We run the experiments that move your whole funnel, not just the top of it.

BUTTONS: [Book a Growth Audit](#) [[See Our Process](#)]

H2

When more ad spend stops working

Every scaling brand hits the same wall. Ad costs climb, conversion rates flatten, and the only lever left seems to be "spend more". The problem is rarely the ads. It is the landing page that loses 70% of visitors, the onboarding that confuses, the customers who buy once and disappear. Growth marketing fixes the leaks between the ad and the repeat purchase.

H2

What is growth marketing?

Growth marketing is a data-driven approach that improves every stage of the customer journey (acquisition, activation, retention, referral and revenue) through rapid, measured experiments. Unlike campaign-based marketing, it treats growth as a continuous system and prioritises the tests most likely to increase customer lifetime value at a lower acquisition cost.

H2

What we do

H3

Funnel analytics and diagnosis

We map your full funnel in GA4, your product analytics and CRM to find exactly where people drop off and what that costs you.

H3

Conversion rate optimisation (CRO)

Landing page and checkout tests, heatmaps, session recordings, form simplification and offer testing that turn more of your existing traffic into customers.

H3 Experiment roadmap

A ranked backlog of growth ideas scored by impact, confidence and effort. We run several experiments a month and keep a learning log you own.

H3 Retention and lifecycle

Email, WhatsApp and push journeys for onboarding, abandoned carts, win-backs and upsells.

H3 Referral and loyalty loops

Programmes that turn happy customers into a low-cost acquisition channel.

H3 Pricing and offer testing

Bundles, trial structures and launch offers tested with real buyers before you commit.

H2 Our growth sprint process

H3 1. Find the one metric

We agree on the north-star metric (for example, monthly paying customers or repeat orders) and the inputs that drive it.

H3 2. Diagnose

Funnel data, customer interviews and competitor review show where growth is stuck.

H3 3. Hypothesise and prioritise

Each idea becomes a testable hypothesis with an expected impact. We pick the best few for each sprint.

H3 4. Test, learn, scale

Two to four week sprints. Winners are rolled out. Learnings are documented. Then we go again.

H2 Who it is for

- Funded startups in Bangalore and Hyderabad that need efficient, repeatable growth.
- D2C and e-commerce brands with healthy traffic but weak conversion or repeat rates.
- SaaS companies improving trial-to-paid conversion.
- Service businesses with high lead volume but low closing rates.

H2 Growth marketing for Bangalore and Hyderabad startups

Bangalore and Hyderabad are home to thousands of startups competing for the same talent, the same investors and often the same customers. Investors now ask about CAC payback and retention before top-line growth. Our growth programmes are built to give you numbers you can put in a board deck, not just a bigger ad bill.

H2 Frequently asked questions

H3 What is the difference between growth marketing and performance marketing?

Performance marketing focuses on acquiring customers through paid ads at a target cost. Growth marketing covers the entire funnel, including conversion, retention, referrals and pricing, and uses continuous experiments to make each customer more valuable and cheaper to acquire. Digi Carotene often runs both together.

H3 How many experiments do you run each month?

It depends on your traffic and team capacity. Most clients run four to eight meaningful experiments a month. Low-traffic sites run fewer, larger tests so results are statistically reliable rather than random.

H3 Is growth marketing only for startups?

No. Any business with an existing flow of visitors or leads can benefit. Restaurants improving repeat orders, clinics improving appointment show-up rates and colleges improving application completion are all growth marketing problems.

EYEBROW LABEL (<p>, not a heading): SEO, AEO AND GEO

H1

Ranking #1 Isn't the Finish Line Anymore. Being the Answer Is.

Your customers are still searching on Google. But more and more, they are also asking ChatGPT, Gemini, Perplexity and Google's AI Overviews, and getting one answer back. We make sure that answer is you.

BUTTONS: [Get Your Free AI Visibility Score](#) [[See Our SEO Process](#)]

H2

Search changed. Most SEO didn't.

In 2026, Google shows AI-generated answers above the regular results for a large share of searches, and a randomized study published this year found those AI Overviews cut clicks to websites by roughly 40%. Meanwhile India has around 100 million weekly ChatGPT users asking it everything from "best skin clinic in Jubilee Hills" to "which CRM should a 50-person company use".

Old-school SEO, which means stuffing keywords and buying links, does not get you into those answers. Clear, trusted, well-structured information does. That is what we build.

H2

What is the difference between SEO, AEO and GEO?

SEO (Search Engine Optimization) improves your rankings in Google's regular results and Maps. AEO (Answer Engine Optimization) structures your content so AI Overviews, featured snippets and voice assistants can quote it directly. GEO (Generative Engine Optimization) increases how often AI tools like ChatGPT, Gemini and Perplexity mention and recommend your brand. You need all three in 2026.

H2 What our search service includes

H3 Technical SEO

Site speed, Core Web Vitals, mobile experience, crawlability, indexing, canonical tags, structured data (schema) and site architecture. The foundation Google and AI crawlers need to understand you.

H3 Local SEO and Google Business Profile

Map pack rankings for "near me" searches across Hyderabad and Bangalore: profile optimisation, categories, photos, posts, Q&A, review strategy and consistent listings on Justdial, Sulekha and industry directories.

H3 Keyword and intent research

We map what your customers actually type and ask, by city and neighbourhood, and match each query to the page best placed to win it.

H3 On-page and content optimisation

Titles, headings, internal links and page copy rewritten to be useful first and keyword-rich second.

H3 Answer Engine Optimization (AEO)

Answer-first content blocks, FAQ and HowTo schema, definition-style summaries and clean HTML structure so your pages get lifted into AI Overviews, featured snippets and voice answers.

H3 Generative Engine Optimization (GEO)

We test how ChatGPT, Gemini, Perplexity and Copilot describe your brand and competitors, then close the gaps: consistent entity information, authoritative third-party mentions, comparison and review content, digital PR and llms.txt.

H3 Authority building

Earned links and mentions from relevant Indian and industry publications, not link farms.

H2 Our SEO process

H3 1. Audit and AI visibility score

A technical, content and backlink audit, plus a prompt test across AI engines showing how often you are mentioned for your most valuable questions.

H3 2. Strategy and roadmap

A 90-day plan prioritised by impact: quick technical wins first, then high-intent pages, then authority.

H3 3. Fix and build

Our developers and writers implement the changes. We do not hand you a 60-page PDF and leave.

H3 4. Measure and expand

Monthly tracking of rankings, organic leads, Google Business Profile actions and AI citation share. Then we expand into the next keyword cluster.

H2 What you can expect, honestly

No one can guarantee a #1 ranking, and anyone who does is guessing. What we commit to is a clear plan, visible work every month and reporting tied to enquiries and revenue. Most clients see technical and local improvements in the first 4 to 8 weeks and meaningful organic lead growth in 3 to 6 months.

H2 SEO for Hyderabad and Bangalore businesses

Local search in these two cities is fiercely competitive. A clinic in Gachibowli competes with hundreds of others across the IT corridor. A cafe in Indiranagar is up against an entire street of them. We build neighbourhood-level relevance through location pages, local reviews, local links and Google Business Profile activity, so you show up for the areas you actually serve, from Kukatpally to Kokapet and from HSR Layout to Hebbal.

H2 Frequently asked questions

H3 How long does SEO take to work?

Technical fixes and Google Business Profile improvements can show results in 4 to 8 weeks. Ranking for competitive keywords and seeing steady organic leads usually takes 3 to 6 months, depending on your website's age, authority and competition in Hyderabad or Bangalore.

H3 How do I get my business recommended by ChatGPT?

AI tools recommend brands they see described consistently across trusted sources. Make sure your website clearly states who you are, what you do and where; keep your details identical on Google Business Profile, LinkedIn and directories; earn reviews and press mentions; and publish answer-first content to the questions customers ask.

H3 Do I still need SEO if people use AI search?

Yes. AI answer engines mostly draw on pages that already rank well and are trusted. Strong SEO is the foundation; AEO and GEO build on it so you appear both in the regular results and in the AI-generated answer.

H3 How much do SEO services cost in Hyderabad?

SEO pricing depends on the number of locations, pages, competition and whether content and development are included. Digi Carotene offers monthly retainers with a fixed scope agreed after a free audit, with clear deliverables and the metrics we will report against.

H3 What is local SEO?

Local SEO helps your business appear in Google Maps and "near me" results in a specific area. It includes optimising your Google Business Profile, building reviews, keeping your name, address and phone consistent across listings, and creating location-specific pages.

EYEBROW LABEL (<p>, not a heading): CONTENT MARKETING

H1

Nobody Wakes Up Wanting to Read Your Brochure.

They wake up with a question. "Is laser hair removal safe?" "Which school board is better for my child?" "How do I choose an ERP?" Content marketing is how you become the brand that answers it, on Google, in AI search and on social, before your competitor does.

BUTTONS: [Get a Free Content Audit](#) [[See Sample Work](#)]

H2

Content that answers beats content that announces

Most brand content talks about the brand: our launch, our award, our team outing. Customers care about their problem. AI answer engines care about clear, trustworthy answers. Content that leads with real questions earns rankings, citations, shares and, eventually, sales.

H2

What is content marketing?

Content marketing is the practice of creating and distributing useful content (articles, guides, videos, social posts, case studies and emails) that answers a target audience's questions and builds trust over time, so that when they are ready to buy, they choose your brand. It powers SEO, AEO, social media and sales conversations.

H2

What we create

H3

SEO and AEO articles

Long-form guides and answer-first blogs based on real search and AI-prompt data, written to rank and to be quoted.

H3

Pillar pages and topic clusters

Authoritative hub pages that make your website the go-to resource on your core topics.

H3

Website and landing page copy

Clear, persuasive copy that turns visitors into enquiries.

H3 Video scripts and short-form content

Reel, YouTube and explainer scripts, including regional-language versions in Telugu, Kannada and Hindi.

H3 Case studies and thought leadership

Proof-led stories, whitepapers and LinkedIn articles for B2B and founder-led brands.

H3 Content distribution

Repurposing one strong idea into blogs, reels, carousels, emails and WhatsApp messages so every piece works harder.

H2 Our content process

H3 1. Research

Search demand, AI prompts, competitor gaps, customer questions from your sales and support teams.

H3 2. Plan

A content calendar mapped to the funnel: awareness, consideration and decision content in the right balance.

H3 3. Create

Written by specialists, reviewed by subject experts on your team where accuracy matters, especially in healthcare, finance and education.

H3 4. Distribute and measure

Every piece is tracked for rankings, AI citations, engagement and the leads it influences.

H2 Content for Hyderabad and Bangalore audiences

Local content wins local searches. A guide to "the best areas to buy a flat near Hitech City" or "school admissions timeline in Bangalore" will outperform generic national content every time. We write with local context, local examples and, where it helps, local languages.

H2 Frequently asked questions

H3 How often should a business publish content?

Consistency matters more than volume. For most businesses, two to four well-researched articles a month, repurposed into social and email content, outperform daily low-quality posts. Digi Carotene sets the frequency based on your competition and goals.

H3 Do you use AI to write content?

We use AI for research and drafting support, but every piece is planned, written and edited by experienced writers and fact-checked. Google and AI engines reward content that shows real expertise, so human judgement stays at the centre.

H3 What kind of content gets cited by AI search engines?

Content that directly answers a specific question in the first few lines, uses clear headings, includes facts with sources, and comes from a brand that is consistently described across the web. FAQ sections, comparison tables and definitions are especially likely to be quoted.

EYEBROW LABEL (<p>, not a heading): SOCIAL MEDIA MARKETING

H1

Followers Don't Pay Rent. Customers Do.

We build social media that people stop for, save, share and act on. Reels with hooks that hold, content calendars rooted in data, communities that reply, and paid social that turns attention into enquiries.

BUTTONS: [Get a Free Social Audit](#) [[See Our Work](#)]

H2

Posting every day isn't a strategy

Many brands post daily and still struggle to get a single enquiry from Instagram. The reason is simple: the content is made for the brand, not for the audience. Platforms reward what people watch to the end, save and send to a friend. That takes research, sharp hooks and constant testing, not just a calendar full of festival greetings.

H2

What does a social media marketing agency do?

A social media marketing agency plans, creates, publishes and manages a brand's content on platforms like Instagram, Facebook, LinkedIn and YouTube, engages with the community, runs paid social campaigns, and measures performance. Digi Carotene measures social success in reach quality, saves, shares, enquiries and sales, not follower count alone.

H2

What we deliver

H3

Social strategy

Audience research, competitor benchmarking, content pillars and platform priorities based on where your buyers actually spend time.

H3

Reels and short-form video

Hook-first scripts, trend-smart formats and edits designed for watch time. Production handled by our in-house Insta Shoot team.

H3

Content calendar and design

Carousels, static posts and stories in a consistent brand look, planned a month ahead and approved in one place.

H3 Community management

Replies to comments and DMs, review responses and escalation, so no lead goes cold in your inbox.

H3 Paid social

Boosting is not a strategy. We run structured Meta and LinkedIn campaigns for awareness, engagement and leads.

H3 Influencer and creator collaborations

Matched to your audience and measured with tracked links and codes.

H2 Our process

H3 1. Audit

What is working, what is not and how you compare with your top three competitors.

H3 2. Strategy

Pillars, formats, posting rhythm and the KPIs we will be judged on.

H3 3. Create and publish

Monthly calendar, shoots, edits, captions and scheduling.

H3 4. Learn and adapt

Monthly analysis of what drove saves, shares and enquiries, then we double down on winners.

H2 Social media for Hyderabad and Bangalore brands

Hyderabad's audience loves food, festivals, cinema and family. Bangalore's responds to wit, startup culture, weekend plans and, yes, traffic jokes. Both cities scroll in English, Telugu, Kannada and Hindi. We create city-specific content and use local creators and trends, so your brand feels like it belongs in the feed.

H2 Frequently asked questions

H3 Which social media platform is best for my business?

Instagram suits food, fashion, beauty, lifestyle, real estate and education. LinkedIn suits B2B, SaaS and personal branding. YouTube suits long-form education and high-consideration products. Facebook still works well for local, family-focused audiences. We recommend platforms based on where your buyers are, not trends.

H3 How many posts per month do you create?

Packages typically include 12 to 30 pieces a month, with a mix of reels, carousels, stories and statics. We recommend fewer, better posts with strong reels over high-volume, low-impact posting.

H3 Can social media actually generate leads?

Yes, when it is built for it. Clear calls to action, link-in-bio landing pages, click-to-WhatsApp ads, lead forms and fast DM replies turn engagement into enquiries. We track every lead source so you can see what social contributes.

EYEBROW LABEL (<p>, not a heading): GRAPHIC DESIGNING

H1

Before Anyone Reads a Word, They've Already Judged the Design.

Design is the first impression your brand makes on a feed, a shelf, a hoarding or a website. We design work that looks good and does a job: gets noticed, builds trust and gets people to act.

BUTTONS: [Start a Design Project](#) [[View Portfolio](#)]

H2

Pretty isn't the brief. Performance is.

A beautiful design that nobody remembers is a cost. A clear, consistent design system that makes every ad and post instantly recognisable is an asset. We design with performance data in mind, including which creatives get clicked, which packaging gets picked up and which layouts convert, and we test ad creatives the way we test headlines.

H2

What is graphic design for marketing?

Graphic design for marketing is the creation of visual assets (logos, brand identities, social media posts, ads, brochures, packaging and signage) that communicate a brand's message and drive a specific action. Effective marketing design balances brand consistency with clarity, so audiences recognise the brand and understand the offer instantly.

H2

What we design

H3

Brand identity

Logo, colour palette, typography, brand guidelines and stationery, built to work across screens, print and signage.

H3

Social media creatives

Carousels, posts, story templates and reel covers in a consistent, recognisable style.

H3 Performance ad creatives

Multiple ad variations sized for Google, Meta and YouTube, built for A/B testing.

H3 Packaging and labels

Shelf-ready packaging for food, beauty and D2C products, including print-ready files.

H3 Print and outdoor

Brochures, menus, flyers, standees, hoardings, metro panels and event branding.

H3 Presentations and sales decks

Pitch decks and company profiles that make complex offers easy to follow.

H2 Our design process

H3 1. Brief and discovery

Your audience, competitors, goals and where the design will live.

H3 2. Concepts

Two to three distinct directions with the reasoning behind each.

H3 3. Refine

Focused revisions on the chosen direction.

H3 4. Deliver and systemise

Final files in every format you need, plus templates so your brand stays consistent.

H2 Designing for Hyderabad and Bangalore markets

Colour, language and cultural cues matter. A festival creative for Bathukamma should not look like one for Ugadi. A menu for an Old City biryani house speaks differently from a menu for an Indiranagar brunch spot. Our designers understand both cities and design with local nuance.

H2 Frequently asked questions

H3 How long does a logo and brand identity take?

A complete brand identity, including logo, colours, fonts and guidelines, typically takes two to four weeks, depending on research depth and revision rounds. Individual creatives like social posts or ads are usually delivered within two to five working days.

H3 Do I get the source files?

Yes. Once the project is complete and paid for, you receive the final source files and full usage rights to the approved designs.

H3 Can you design ads that perform better?

Yes. We design multiple variations per campaign, testing hooks, visuals, offers and formats, and use the results from your ad accounts to guide the next round. Design decisions are backed by click and conversion data.

EYEBROW LABEL (<p>, not a heading): WEB DESIGN AND DEVELOPMENT

H1

Your Website Is Either Your Best Salesperson or the Reason Leads Quietly Leave.

Most visitors decide within seconds whether to stay. We design and build websites that load fast, explain clearly, rank on Google, get read by AI and turn visitors into enquiries.

BUTTONS: [Get a Free Website Review](#) [[View Our Websites](#)]

H2

A beautiful website that doesn't convert is an expensive brochure

We see it all the time: a stunning homepage, a contact form buried three clicks deep, a mobile version that takes eight seconds to load and service pages that never say what the business actually does. Every ad rupee and SEO effort you make ends up on your website. If the site leaks, everything leaks.

H2

What makes a website effective in 2026?

An effective website loads in under three seconds on mobile, clearly explains what the business does and for whom, makes the next step obvious, is technically optimised for search engines and AI crawlers, and is connected to analytics and a CRM so every enquiry can be tracked back to its source.

H2

What we build

H3

Business and corporate websites

Clear, credible websites for service businesses, B2B and professional firms.

H3

Landing pages for ads

Focused, fast pages for Google and Meta campaigns, built to match each ad's promise and tested for conversion.

H3

E-commerce websites

Shopify and WooCommerce stores with clean product pages, fast checkout and payment gateway integration.

H3 Custom web applications

Booking systems, configurators, portals and dashboards built around your workflow.

H3 Website redesigns and migrations

Modernising old sites without losing the rankings you have already earned.

H3 Integrations and automation

CRM, WhatsApp Business API, payment gateways, booking tools and analytics, connected properly.

H2 Every website we build includes

- Mobile-first design and Core Web Vitals optimisation.
- Technical SEO setup: clean URLs, unique meta tags, canonical tags, XML sitemap, schema markup.
- AEO-ready page structure with clear headings and FAQ sections.
- GA4, Google Tag Manager and conversion tracking.
- Clear calls to action, WhatsApp and click-to-call on mobile.
- Training so your team can update content without calling a developer.

H2 Our process

H3 1. Discover

Goals, audience, competitors and the actions you want visitors to take.

H3 2. Structure and content

Sitemap, wireframes and conversion-focused copy before any visuals.

H3 3. Design

Brand-aligned visual design for mobile and desktop.

H3 4. Build and test

Development, speed optimisation, cross-device testing and SEO checks.

H3 5. Launch and improve

Go-live, redirects, tracking checks and post-launch conversion improvements.

H2 Web development for Hyderabad and Bangalore businesses

We build for local businesses that need more walk-ins and calls, and for Bangalore and Hyderabad startups that need a site investors and enterprise buyers take seriously. Local SEO, Google Maps integration and city-specific landing pages are built in from day one.

H2 Frequently asked questions

H3 How long does it take to build a website?

A business website of 8 to 15 pages typically takes four to eight weeks from kickoff to launch. Landing pages can go live in one to two weeks. E-commerce and custom builds depend on features and integrations.

H3 Will my website be SEO-friendly?

Yes. Every Digi Carotene website includes technical SEO setup, including fast load times, mobile optimisation, unique meta tags, schema markup and a clean structure, plus AEO-ready content blocks so search engines and AI assistants can understand and quote your pages.

H3 Which platform do you build on?

We recommend the platform based on your needs: WordPress for content-rich sites you want to manage yourself, Shopify for e-commerce, and Next.js or custom builds for high-performance or application-style websites.

H3 Do you offer website maintenance?

Yes. We offer monthly maintenance covering security updates, backups, uptime monitoring, speed checks and small content changes.

EYEBROW LABEL (<p>, not a heading): PERSONAL BRANDING

H1

People Buy From People. Especially the One at the Top.

Before a client signs, an investor commits or a candidate joins, they look you up. They check your LinkedIn, your Instagram, what the press says and, increasingly, what ChatGPT says about you. We make sure what they find builds trust.

BUTTONS: [Book a Personal Brand Audit](#) [[See How It Works](#)]

H2

Your reputation is already online. The question is who's writing it.

Founders, doctors, consultants and executives are often the most trusted asset a business has, and the least visible one. A thoughtful LinkedIn presence, a few strong media mentions and a clear story can open doors that ad budgets never will. Done badly, it reads as self-promotion. Done well, it reads as expertise.

H2

What is personal branding?

Personal branding is the strategic process of defining and communicating an individual's expertise, values and story across platforms such as LinkedIn, Instagram, podcasts, media and search, so the right audience recognises and trusts them. For founders and professionals, a strong personal brand drives business opportunities, hiring, partnerships and investor confidence.

H2

What we do

H3

Positioning and story

We define what you want to be known for, who needs to know it and the story that makes you memorable.

H3

LinkedIn growth

Profile optimisation, ghostwritten posts in your voice, carousels, newsletters and engagement strategy.

H3 Instagram and video presence

Short-form video, behind-the-scenes and educational content shot with our production team, ideal for doctors, coaches, stylists and creators.

H3 Thought leadership and PR

Bylined articles, podcast and panel placements, award entries and media interviews.

H3 Search and AI reputation

A consistent bio, structured data, Wikipedia-style "about" content and authoritative mentions, so Google and AI engines describe you accurately.

H2 Our process

H3 1. Audit

What appears today when people search your name on Google and ask AI about you.

H3 2. Interviews

Two to three recorded conversations to capture your voice, opinions and stories.

H3 3. Content engine

A monthly calendar of posts and videos you approve in minutes, not hours.

H3 4. Amplify

PR, speaking opportunities and collaborations that multiply reach.

H2 Who it is for

- Startup founders in Bangalore and Hyderabad building credibility with investors, talent and customers.
- Doctors and healthcare professionals building patient trust.
- Consultants, lawyers and chartered accountants growing referrals.
- CXOs and senior leaders preparing for their next chapter.
- Creators, stylists and coaches turning expertise into a business.

H2 Frequently asked questions

H3 Do I have to write my own posts?

No. We interview you, capture your opinions and stories, and write posts in your voice. You review and approve. Most clients spend 30 to 60 minutes a month on their personal brand once the system is running.

H3 How long does it take to build a personal brand on LinkedIn?

Most people see noticeably better engagement and inbound conversations within 8 to 12 weeks of consistent posting. Building recognised authority in your industry usually takes 6 to 12 months.

H3 Is personal branding only for big founders?

Not at all. Doctors, consultants, small business owners and mid-career professionals often benefit the most, because a strong personal brand directly brings them clients, referrals and opportunities.

NOTE (do not publish)

Recommend renaming the menu item to "Email and WhatsApp Marketing". In India, WhatsApp is where retention happens, and it is a strong, under-served search term. Keep the URL /email to avoid breaking links, or create /email-whatsapp-marketing with a redirect.

EYEBROW LABEL (<p>, not a heading): EMAIL AND WHATSAPP MARKETING

H1

The Cheapest Customer Is the One Who Already Said Yes Once.

Winning a new customer costs far more than bringing back an existing one. Yet most brands spend almost everything on acquisition and almost nothing on the people already in their database. We build automated email and WhatsApp journeys that turn one-time buyers into regulars.

BUTTONS: [Get a Free Retention Audit](#) [[See How It Works](#)]

H2

Your database is your most under-used asset

Every past customer, enquiry, cart and walk-in phone number is a relationship waiting for the right message at the right time. Sent badly, messages get ignored or blocked. Sent well (personal, timely and useful), they become your highest-return channel.

H2

What is email and WhatsApp marketing?

Email and WhatsApp marketing is the use of permission-based messages, often automated, to nurture leads, onboard new customers, recover abandoned carts, remind people to rebook and announce offers. In India, WhatsApp typically delivers much higher open and response rates than email, while email remains strong for B2B, newsletters and detailed content.

H2

What we set up and run

H3

WhatsApp Business API setup

Verified business account, approved message templates, catalogue, quick replies and integration with your CRM or website.

H3 Automated journeys

Welcome series, abandoned cart, booking reminders, post-purchase follow-ups, review requests, birthday offers and win-back flows.

H3 Broadcast campaigns

Segmented offers and announcements that respect frequency limits and opt-outs.

H3 Email newsletters

Well-designed, mobile-friendly newsletters for B2B, education and content-led brands.

H3 Chatbots and lead qualification

WhatsApp chatbots that answer FAQs, qualify leads and book appointments around the clock.

H3 Deliverability and compliance

Domain authentication (SPF, DKIM, DMARC), list hygiene and opt-in practices that keep you out of spam and in line with platform policies and India's data protection rules.

H2 Our process

H3 1. Audit your data

What contact data you have, how it is collected and how clean it is.

H3 2. Map the journeys

The moments in your customer lifecycle where a message can change behaviour.

H3 3. Build and write

Templates, copy, design and automation logic.

H3 4. Measure and refine

Open, click, reply, booking and revenue tracking per journey, improved every month.

H2 Who it works best for

- Restaurants and cloud kitchens driving repeat orders.
- Clinics, salons and wellness brands reducing no-shows and driving rebookings.
- E-commerce and D2C brands recovering carts and growing repeat purchases.
- Schools and colleges nurturing admission enquiries.
- B2B companies nurturing long sales cycles.

H2 Frequently asked questions

H3 Is WhatsApp marketing allowed in India?

Yes, when done through the official WhatsApp Business Platform with customer opt-in and approved message templates. Bulk messaging from personal or unofficial tools violates WhatsApp's policies and can get numbers banned. Digi Carotene sets up compliant WhatsApp Business API accounts.

H3 Is email marketing still effective in India?

Yes, especially for B2B, education, e-commerce and content-led brands. Email is ideal for detailed information, newsletters and long nurture sequences, while WhatsApp suits quick, transactional and time-sensitive messages. Most brands get the best results using both.

H3 How much does WhatsApp Business API cost?

WhatsApp charges per message based on the message category (marketing, utility or authentication) and country, in addition to any platform provider fees. We help you estimate costs based on your volumes before setup.

EYEBROW LABEL (<p>, not a heading): INSTA SHOOT

H1

The Algorithm Rewards Content That Looks Like It Belongs in the Feed.

Not polished TV ads. Not stock photos. Real, scroll-stopping reels and photos of your food, your space, your product and your people, planned, shot and edited by a team that understands both cameras and conversion.

BUTTONS: [Book a Shoot](#) [[See Our Reels](#)]

H2

Great content is planned before the camera is switched on

The difference between a reel that gets 500 views and one that gets 50,000 is rarely the camera. It is the hook in the first two seconds, the pacing, the on-screen text and whether it feels native to the platform. Our shoots start with scripts and shot lists built from what is actually performing in your category.

H2

What is an Instagram content shoot?

An Instagram content shoot is a planned photo and video production session designed specifically for social media formats such as Reels, Stories and carousels. It typically includes concept and script development, a shot list, on-location filming with mobile-first framing, and editing with hooks, captions, transitions and trending audio, delivering a batch of ready-to-post content.

H2

What is included

H3

Concept and scripting

Hook-first scripts, reel concepts and shot lists aligned with your content calendar and campaigns.

H3

On-location production

Our crew comes to your restaurant, clinic, salon, showroom, office or event with professional cameras, lighting and audio.

H3

Product and food photography

Catalogue, menu and lifestyle shots that look as good as the real thing.

H3 Founder and team videos

Talking-head content, interviews and behind-the-scenes that build trust and personal brands.

H3 Editing and post-production

Vertical edits with captions, motion text, colour grading and platform-ready exports.

H3 Regional language voiceovers

Telugu, Kannada, Hindi and English voiceovers and subtitles for wider local reach.

H2 How a shoot day works

H3 1. Pre-production call

We agree on goals, concepts, scripts, location, talent and props.

H3 2. Shoot day

A focused half-day or full-day session to capture a month's worth of content in one go.

H3 3. Edit and review

First cuts within **[X]** working days, with one round of revisions included.

H3 4. Publish and learn

Content goes into your calendar, and performance data shapes the next shoot.

H2 Shoots across Hyderabad and Bangalore

Our production team shoots across Hyderabad, from Jubilee Hills restaurants to Hitech City offices and Kokapet showrooms, and travels to Bangalore for brands in Koramangala, Indiranagar, Whitefield and beyond. One shoot day can fuel a month of content.

H2 Frequently asked questions

H3 How many reels can you shoot in one day?

In a well-planned full-day shoot we typically capture footage for 8 to 15 reels plus a set of photos, depending on locations, outfit changes and complexity. A half-day shoot usually covers 4 to 8 reels.

H3 Do I need to provide models or talent?

Not necessarily. Many of the best-performing reels feature founders, staff or real customers. If you need models, anchors or creators, we can source and manage them for you.

H3 Do you also post the content?

Yes. Shoots can be booked on their own or bundled with our social media management, where we plan, publish and track the content's performance.

EYEBROW LABEL (<p>, not a heading): OFFLINE AND EXPERIENTIAL MARKETING

H1 Some Moments Can't Be Scrolled Past.

A sampling counter at a busy mall on a Sunday. A stall at the society gate during Diwali week. A takeover at the metro station a commuter passes every morning. Offline marketing puts your brand in front of real people at the exact moment they are ready to notice. We make sure every one of those moments is measured.

BUTTONS: [Plan an Activation](#) [[Talk to Our On-Ground Team](#)]

H2 Offline is not old-school. Unmeasured offline is.

Out-of-home was the only traditional medium in India to grow in 2025, while feeds keep getting more crowded and more expensive. The problem with offline was never reach; it was proof. We fix that with QR journeys, WhatsApp opt-ins, unique offer codes, lead capture tablets and follow-up retargeting, so footfall becomes a number in your dashboard, not a guess in a report.

H2 What is BTL or offline marketing?

BTL (below-the-line) or offline marketing reaches specific audiences through direct, physical experiences such as mall activations, residential society events, campus programmes, product sampling, pop-up stores, transit branding and corporate events. Unlike mass media, BTL targets defined groups in defined places, making it ideal for trials, launches and local demand.

H2 Our offline marketing services

H3 Mall Activations

Kiosks, sampling and experiential booths where weekend shoppers are already in a buying mood.

H3 Residential Activations

Gated community and apartment events that reach hundreds of households in one place.

H3 Theatre Marketing

On-screen ads and lobby activations in front of focused multiplex audiences.

H3 Campus Activations

Fests, sponsorships and brand ambassador programmes for Gen Z.

H3 Corporate Events

Launches, conferences, dealer meets and employee engagement events.

H3 Festival Marketing

Campaigns built around Sankranti, Bonalu, Bathukamma, Ugadi, Ganesh Chaturthi, Dasara, Diwali and more.

H3 Pop-up Stores

Short-run retail spaces that test markets and create urgency.

H3 Influencer Campaigns

Creators who show up, experience your brand and broadcast it.

H3 Metro Branding

Station and train branding on Hyderabad Metro and Bengaluru's Namma Metro.

H2 How we make offline measurable

- Every activation has a target: leads, sign-ups, samples, sales or app installs.
- QR codes and short links tied to unique UTM parameters for each location and day.
- WhatsApp opt-ins that start a conversation, not a forgotten pamphlet.
- Lead capture on tablets, synced to your CRM.
- Meta and Google retargeting to everyone who engaged on the ground.
- A post-activation report with footfall, engagements, leads, cost per lead and learnings.

H2 On the ground in Hyderabad and Bangalore

We know where the crowds are and when: the IT corridor at lunch hour, the Old City in Ramzan, Koramangala on a Friday night and Whitefield malls on Sunday afternoon. Our team handles venue permissions, vendor coordination, fabrication, staffing and on-site management in both cities.

H2 Frequently asked questions

H3 How do you measure the ROI of offline marketing?

We set a target before the activation, then track results through QR scans, unique codes, WhatsApp opt-ins, tablet lead capture and sales data. Everyone who engages is retargeted online, so we can measure conversions that happen days later, not just on the spot.

H3 Do you handle permissions and venue bookings?

Yes. Digi Carotene manages venue negotiations, mall and society permissions, and required local approvals, along with fabrication, staffing and logistics, so you deal with one team.

H3 How far in advance should I plan an activation?

Ideally three to six weeks for mall, residential and campus activations, and six to ten weeks for large events, metro branding or festival campaigns, since premium slots and dates book out early.

CLOSING CTA SECTION (H2 + text + buttons)

EYEBROW LABEL (<p>, not a heading): MALL ACTIVATIONS

H1

Weekend Mall Crowds Aren't Just Browsing. They're in a Buying Mood.

Families with time, couples with plans and shoppers with wallets already open. A mall activation puts your brand in front of thousands of people at the exact moment they are looking for something new to try. We design, build and run activations that get people to stop, try and sign up.

BUTTONS: [Plan a Mall Activation](#) [[See Formats](#)]

H2

Footfall is easy. Engagement is the job.

Thousands of people walk past a mall kiosk every weekend. Most kiosks get ignored because they look like every other stall and ask for too much too soon. Ours are built around one simple hook (a game, a free trial, a photo moment, an instant offer) and a two-tap way to stay in touch.

H2

What is a mall activation?

A mall activation is a short-term branded experience set up inside a shopping mall, such as a kiosk, sampling counter, interactive booth or atrium event, designed to engage shoppers directly, drive product trials, capture leads and create social buzz. Mall activations work best for consumer, retail, food, beauty, real estate, automotive and fintech brands.

H2

Formats we run

H3

Sampling and trial counters

Let shoppers taste, touch or try. Ideal for food, beverages, beauty and personal care.

H3

Interactive kiosks and games

Spin-the-wheel, touchscreen quizzes and AR experiences with instant rewards and lead capture.

H3

Atrium takeovers

High-visibility installations and stage events for launches and big-ticket brands.

H3 Lead generation booths

Real estate, education, automotive, fintech and insurance booths with trained promoters and tablet-based capture.

H3 Photo and content moments

Instagrammable installations that turn shoppers into content creators.

H2 What we deliver

- Venue research and selection based on audience fit and footfall patterns.
- Kiosk or booth design, 3D visuals and fabrication.
- Mall permissions, slot booking and coordination.
- Trained, briefed brand promoters.
- QR, WhatsApp and tablet lead capture synced to your CRM.
- Live daily updates and a post-activation report with leads, cost per lead and learnings.
- Retargeting campaigns to everyone who engaged.

H2 Our process

H3 1. Understand

Your goal, audience and budget, matched to the right malls, days and formats.

H3 2. Plan

Booth concept, engagement mechanic, staffing plan and tracking setup.

H3 3. Build

Fabrication, branding, tech setup and promoter training.

H3 4. Run and refine

Live execution with daily reporting and on-the-spot tweaks to what works.

H2 Mall activations in Hyderabad and Bangalore

Hyderabad's malls draw very different crowds, from IT professionals around Hitech City and Gachibowli to families in Kukatpally, Ameerpet and Dilsukhnagar. Bangalore's range from the tech-heavy east around Whitefield to the established neighbourhoods of the south and the newer malls in the north. We pick venues by who shops there, not just how many.

H2 Frequently asked questions

H3 How do you track the ROI of a mall activation?

Every engagement is captured through QR scans, WhatsApp opt-ins, unique offer codes or tablet sign-ups, each tagged by mall and day. We report leads, cost per lead and redemptions, then retarget all engaged shoppers online to capture conversions that happen later.

H3 Do you handle mall permissions?

Yes. We manage slot bookings, mall approvals, insurance and fabrication guidelines, and coordinate directly with mall marketing teams so you do not have to.

H3 How long does a mall activation usually run?

Most mall activations run over a weekend (two to three days) or across consecutive weekends. Lead generation booths for real estate or education often run two to four weeks for consistent volume.

H3 How much does a mall activation cost?

Costs depend on the mall, location within the mall, duration, booth size, fabrication and staffing. After understanding your goals, we share options at different budgets with expected engagement and lead estimates.

EYEBROW LABEL (<p>, not a heading): RESIDENTIAL ACTIVATIONS

H1 Hundreds of Households. One Gate. Zero Ad Clutter.

Large gated communities in Hyderabad and Bangalore are towns in their own right, with families, decision-makers and a clubhouse calendar. A well-run society activation puts your brand in front of the people who buy groceries, book clinics, choose schools and renovate homes, in the one place they trust most.

BUTTONS: [Plan a Society Activation](#) [[See Formats](#)]

H2 The most trusted media in India is a neighbour's recommendation

In a gated community, word travels fast. One good experience at the weekend stall becomes a WhatsApp group recommendation by Monday. That is why residential activations work so well for local services, home brands, healthcare, education and food: they combine direct reach with built-in word of mouth.

H2 What is a residential activation?

A residential activation is a brand event or stall set up inside a gated community, apartment complex or residential township, usually with the approval of the residents' welfare association. It allows brands to demonstrate products, offer trials, run health camps or workshops, and capture leads from households in a trusted, uncluttered environment.

H2 Formats we run

H3 Weekend stalls and canopies

Product demos, sampling and on-the-spot offers at clubhouse or entrance areas.

H3 Health and wellness camps

Free check-ups, eye tests, dental screening and nutrition consults for clinics, hospitals and diagnostics brands.

H3 Kids and family events

Workshops, contests and play zones that bring entire families to your brand.

H3 Festival celebrations

Sponsoring Diwali, Ganesh, Bathukamma, Ugadi or Christmas events inside societies.

H3 Door-to-door and lift branding

Permission-based flyers, lift panels and notice board branding to support events.

H2 What we deliver

- A curated list of societies matched to your audience profile and price point.
- RWA and facility management permissions.
- Stall design, branding and setup.
- Trained promoters and subject experts (for example, doctors for health camps).
- WhatsApp-based lead capture and follow-up journeys.
- A society-wise report of footfall, leads and conversions.

H2 Our process

H3 1. Select

Societies chosen by size, location and resident profile.

H3 2. Secure

Permissions, dates and slots aligned with weekends and community events.

H3 3. Execute

Setup, engagement and lead capture with daily reporting.

H3 4. Follow up

WhatsApp and call follow-ups within 24 hours, when interest is highest.

H2 Residential activations across Hyderabad and Bangalore

In Hyderabad we cover large communities across Gachibowli, Kondapur, Narsingi, Kokapet, Tellapur, Manikonda, Kukatpally, Miyapur and Kompally. In Bangalore, we reach townships across Whitefield, Sarjapur Road, Electronic City, Hebbal, Yelahanka, Kanakapura Road and North Bangalore.

H2 Frequently asked questions

H3 Which businesses benefit most from society activations?

Clinics, hospitals, diagnostics labs, schools, coaching institutes, home interiors, furniture, solar, water purifiers, groceries, food brands, fitness studios and financial services see strong results because they sell to families making household decisions.

H3 Do you get permission from the society?

Yes. All residential activations are run with written approval from the residents' welfare association or facility management. We never run unauthorised door-to-door campaigns.

H3 How many societies should I cover?

For a local service, three to five well-matched societies near your location over a month usually gives a clear read on response. Larger brands often run rolling programmes across 20 or more communities.

Schema (JSON-LD)	Service (serviceType: Cinema Advertising) + FAQPage + BreadcrumbList

PAGE COPY

EYEBROW LABEL (<p>, not a heading): THEATRE MARKETING

H1 A Dark Room, a Giant Screen and No Skip Button.

Cinema is one of the few places left where an audience sits still, looks forward and pays full attention. In Hyderabad, where movies are close to a religion, and in Bangalore's packed multiplexes, theatre marketing gives your brand a big-screen moment that no feed can match.

BUTTONS: [Plan a Cinema Campaign](#) [[See Formats](#)]

H2 Attention is the scarcest thing in marketing

On a phone, your ad competes with a hundred notifications and a thumb ready to scroll. In a cinema, it is the biggest thing in the room. That is why cinema works so well for launches, real estate, automotive, local retail and any brand that wants to look bigger than its budget.

H2 What is theatre marketing?

Theatre marketing (cinema advertising) is the use of movie theatres to reach audiences through on-screen ads played before and during films, lobby and foyer branding, digital screens, ticket and F&B branding, and experiential activations. Brands can target specific screens, localities, languages and movies, making cinema effective for both mass and hyper-local campaigns.

H2 Formats we plan

H3 On-screen ads

10 to 60 second spots shown before the film and at the interval, targeted by city, property, screen, language and movie.

H3 Lobby and foyer activations

Experiential booths, sampling, product displays and photo zones where audiences wait.

H3 Digital lobby screens and standees

High-visibility placements at entry, ticketing and F&B counters.

H3 Movie tie-ins and premieres

Associate your brand with a big release through contests, screenings and co-branded content.

H3 Ad film production

Cinema-grade ad films produced by our production team, with Telugu, Kannada, Hindi and English versions.

H2 Our process

H3 1. Target

Choose properties, screens, languages and release windows based on your audience and catchment.

H3 2. Create

Produce or adapt your ad film for the big screen, with a clear call to action and QR.

H3 3. Book and run

Media buying with cinema partners, plus lobby activation logistics if required.

H3 4. Measure

Screening confirmations, QR scans, offer redemptions and footfall uplift near the cinema.

H2 Cinema marketing in Hyderabad and Bangalore

Hyderabad has one of India's most passionate cinema cultures. Big Telugu releases draw full houses from the first show. Bangalore's multiplexes pull a mix of Kannada, Telugu, Tamil, Hindi and English audiences. We match your ad to the language and movie your audience is actually watching, and target screens close to your stores or project site.

H2 Frequently asked questions

H3 Is cinema advertising effective for local businesses?

Yes. Because you can choose specific theatres and screens, a restaurant, clinic, showroom or real estate project can target audiences within a few kilometres of its location. Adding a QR code or local offer makes the response measurable.

H3 Can I choose which movies my ad plays with?

In many cases, yes. You can target by language and often by specific films or genres, which is useful for aligning with big releases or audiences such as families, youth or premium viewers.

H3 How long should a cinema ad be?

Most cinema ads run 10, 20 or 30 seconds. Shorter spots suit reminder and offer messages, while 30 to 60 seconds suits launches and storytelling. We recommend length based on your goal and budget.

EYEBROW LABEL (<p>, not a heading): CAMPUS ACTIVATIONS

H1

Gen Z Can Spot an Ad From a Mile Away. So Don't Bring One. Bring an Experience.

Students do not respond to banners. They respond to brands that show up with something fun, useful or worth sharing. We create campus activations that students actually join, talk about and post, and we connect every interaction to your app, store or CRM.

BUTTONS: [Plan a Campus Campaign](#) [[See Formats](#)]

H2

Win them early, win them for years

The choices students make today, including their first phone plan, first bank account, favourite food app and go-to clothing brand, often stick for a decade. Hyderabad and Bangalore are two of India's biggest student hubs, with engineering, management, design, medical and arts colleges packed with digital-first young adults. Campus is where brand loyalty starts.

H2

What is a campus activation?

A campus activation is a brand engagement programme run inside or around colleges and universities, through fest sponsorships, branded stalls, workshops, competitions, sampling and student ambassador networks, to build awareness, drive trials, app downloads or sign-ups, and create authentic word of mouth among students.

H2

Formats we run

H3

Fest sponsorships and stalls

Branded zones at cultural and technical fests with games, sampling and content moments.

H3

Campus ambassador programmes

Trained student ambassadors who promote your brand, run challenges and drive referrals with tracked codes.

H3

Workshops and bootcamps

Skill sessions, hackathons and career talks that add value and build credibility.

H3 Contests and challenges

Reel challenges, quizzes and competitions that generate user content and reach.

H3 Admission and recruitment drives

For colleges and employers: awareness, counselling and hiring campaigns on target campuses.

H2 Our process

H3 1. Choose campuses

Shortlist colleges by course, student profile, location and fest calendar.

H3 2. Design the hook

An experience students want to join and share, not a pamphlet.

H3 3. Activate

Permissions, setup, ambassadors and on-ground execution.

H3 4. Track and extend

Referral codes, app installs, QR sign-ups, social reach and retargeting.

H2 Campus marketing in Hyderabad and Bangalore

We plan around academic calendars, from fest season to exam blackouts, across engineering, management and degree colleges in Hyderabad's Gachibowli, Kukatpally, Ghatkesar and Shamshabad belts and Bangalore's RR Nagar, Hosur Road, Yelahanka and central college clusters.

H2 Frequently asked questions

H3 What kinds of brands do well with campus activations?

Food and beverage, fashion, telecom, fintech, banking, edtech, apps, gaming, personal care, two-wheelers and recruiting employers see strong results because students are actively forming habits and choosing brands for the first time.

H3 When is the best time for campus activations?

Fest season, orientation weeks and the weeks before exams start are the best windows. We avoid exam periods and holidays. Most college fests in Hyderabad and Bangalore cluster between January and April and again around August to October.

H3 How do you measure campus campaign results?

Through unique referral codes, app installs, QR sign-ups, ambassador leaderboards, social content reach and sales from campus-specific offers, all reported by college.

CLOSING CTA SECTION (H2 + text + buttons)

EYEBROW LABEL (<p>, not a heading): CORPORATE EVENTS

H1

An Event Is Over in a Day. The Right One Pays Off for a Year.

A launch that gets press. A conference that fills your pipeline. A dealer meet that sets the sales tone for the year. A town hall your people actually remember. We plan and produce corporate events with one extra thing most event companies forget: what happens after.

BUTTONS: [Plan Your Event](#) [[See Event Types](#)]

H2

Most events end when the lights go off. Ours don't.

Big budgets are often spent on stage, sound and catering, while the content, follow-up and PR that create lasting value are an afterthought. Because we are a marketing agency first, every event we run comes with a content plan, a lead capture plan and a post-event amplification plan.

H2

What does a corporate event management company do?

A corporate event management company plans, designs and executes business events such as product launches, conferences, award nights, dealer meets, offsites and employee engagement programmes, handling venue, production, logistics, guest management and on-the-day execution. Digi Carotene also handles event marketing, content coverage and PR so the event's impact extends beyond the day.

H2

Events we manage

H3

Product and brand launches

Reveal moments, media previews and launch experiences designed to be shared.

H3

Conferences and summits

Speaker management, registrations, stage production, live streaming and lead capture.

H3

Dealer and partner meets

Recognition, training and incentive events that energise your sales network.

H3 Award nights and galas

Concept, stage design, entertainment and flawless run-of-show.

H3 Employee engagement and offsites

Town halls, family days, festival celebrations and team experiences.

H3 Event coverage and content

Photography, video, same-day reels and highlight films from our production team.

H2 Our process

H3 1. Objective

What success looks like: leads, media coverage, sales targets or engagement scores.

H3 2. Concept and plan

Theme, venue, budget, run-of-show and marketing plan.

H3 3. Produce

Fabrication, AV, talent, vendors, guest management and rehearsals.

H3 4. Execute

On-ground team managing every detail on the day.

H3 5. Amplify

Same-day content, press releases, follow-up campaigns and a results report.

H2 Events in Hyderabad and Bangalore

From convention centres and hotel ballrooms in Hyderabad's HITEC City and Financial District to tech parks and venues across Bangalore's Outer Ring Road, Whitefield and city centre, we know the venues, the vendors and the logistics of both cities.

H2 Frequently asked questions

H3 How far in advance should we plan a corporate event?

For events of 100 to 300 guests, start six to eight weeks ahead. Large conferences, launches and award nights need three to six months for venue booking, speakers and production. We can also execute shorter timelines when needed.

H3 Do you handle event marketing and registrations?

Yes. We manage event websites, registration pages, email and WhatsApp invites, paid promotion, attendee communication and post-event follow-ups, along with on-ground production.

H3 Can you cover the event with photos and videos?

Yes. Our in-house production team covers events with photography, video, live reels and highlight films, so you have content for social media, PR and internal communications.

CLOSING CTA SECTION (H2 + text + buttons)

EYEBROW LABEL (<p>, not a heading): FESTIVAL MARKETING

H1

In Hyderabad and Bengaluru, the Calendar Is the Media Plan.

From Sankranti kites to Bathukamma flowers, Ugadi pachadi to Dasara lights, festivals are when families shop, gift, celebrate and spend the most. They are also when every brand shouts at once. We help you show up with meaning, not noise.

BUTTONS: [Plan Your Festive Campaign](#) [[See Our Calendar](#)]

H2

Every brand posts "Happy Diwali". Few are remembered for it.

Festive season is the busiest and most expensive time to advertise. Generic greetings get lost. What works is cultural understanding, an offer that fits the moment and a presence where celebrations actually happen: in pandals, society events, markets and family WhatsApp groups.

H2

What is festival marketing?

Festival marketing is the planning of campaigns around cultural and religious festivals, such as Sankranti, Ugadi, Ganesh Chaturthi, Dasara, Diwali, Eid and Christmas, using themed creatives, offers, on-ground activations, sponsorships and digital campaigns to connect with audiences when emotional engagement and purchase intent are at their highest.

H2

What we plan

H3

Festive campaign strategy

Annual and seasonal plans that decide which festivals to own, with what message and budget.

H3

Culturally rooted creatives

Telugu, Kannada, Hindi and English content that respects traditions and feels local.

H3

On-ground festival activations

Pandal and event sponsorships, society celebrations, market stalls and sampling.

H3 Festive offers and gifting

Offer architecture, gift packs and corporate gifting campaigns.

H3 Digital festive campaigns

Reels, influencer collaborations and performance ads timed to peak shopping days.

H2 The festival calendar we plan around

- Sankranti and Pongal (January): homecoming, kites, family shopping.
- Ugadi (March to April): new beginnings for Telugu and Kannada households.
- Ramzan and Eid: Hyderabad's Old City comes alive at night.
- Bonalu (July to August): a uniquely Hyderabadi celebration.
- Ganesh Chaturthi (August to September): pandals in both cities, with massive community reach.
- Bathukamma and Dasara (September to October): Telangana's floral festival and Mysuru-style Dasara pride in Karnataka.
- Diwali (October to November): India's biggest shopping season.
- Christmas and New Year: Bangalore's Brigade Road and Church Street, and Hyderabad's party season.

H2 Our process

H3 1. Calendar

We map the festivals that matter to your audience and plan 8 to 12 weeks ahead.

H3 2. Idea

One strong, culturally relevant idea per festival, not a greeting template.

H3 3. Activate

On-ground presence, creatives, influencers and ads launched in sync.

H3 4. Measure

Sales, footfall, redemptions and engagement compared with previous festive seasons.

H2 Frequently asked questions

H3 When should we start planning festive campaigns?

Start at least 8 to 12 weeks before the festival. Pandal sponsorships, premium media and influencer slots for Ganesh Chaturthi, Dasara and Diwali often book out a month or more in advance.

H3 How do you avoid culturally insensitive campaigns?

Our team is rooted in Hyderabad and Bangalore. We research each festival's traditions, run creatives past native-language reviewers and avoid using sacred symbols casually. When in doubt, we choose respect over shock value.

H3 Can small businesses benefit from festival marketing?

Yes. Local festivals are ideal for small businesses, with society stalls, neighbourhood pandal sponsorships, WhatsApp offers and hyper-local ads delivering strong returns on modest budgets.

CLOSING CTA SECTION (H2 + text + buttons)

EYEBROW LABEL (<p>, not a heading): POP-UP STORES

H1

Scarcity Sells. A Store That Disappears on Sunday Sells Faster.

A pop-up store gives online brands a physical home, gives established brands a fresh stage, and gives customers a reason to come now. We find the location, design the space, build it, staff it and measure it.

BUTTONS: [Plan a Pop-up](#) [[See Formats](#)]

H2

The cheapest way to test a city before you commit

Signing a long retail lease without knowing if a neighbourhood will buy is a big bet. A pop-up lets you test demand, pricing and product mix in Hyderabad or Bangalore for weeks instead of years, while building buzz, content and a customer list.

H2

What is a pop-up store?

A pop-up store is a temporary retail space, open for a few days to a few months, that brands use to launch products, test new markets, sell seasonal collections, create brand experiences and collect customer data. Pop-ups can be set up in malls, high streets, cafes, co-working spaces, events or standalone structures.

H2

Formats we build

H3

D2C brand pop-ups

Let online-first brands meet customers in person, build trust and drive website sales.

H3

Product launch pop-ups

Experiential spaces for unveiling a new product, collection or flavour.

H3

Festive and seasonal shops

Gifting, ethnic wear and festive collections timed to peak shopping weeks.

H3

Collaborative pop-ups

Shared spaces with complementary brands to split costs and audiences.

H3 Event and flea market stalls

Curated presence at weekend markets, exhibitions and festivals.

H2 What we deliver

- Location scouting by footfall, audience and rental cost.
- Store concept, layout and 3D visuals.
- Modular fabrication, branding, lighting and fixtures.
- POS, inventory and payment setup.
- Trained staff and daily operations.
- Launch promotion: influencers, invites, ads and PR.
- A results report covering footfall, conversion, average bill, top products and the customer list.

H2 Our process

H3 1. Scout

Neighbourhoods and venues that match your buyer.

H3 2. Design

A space people want to walk into and photograph.

H3 3. Build and launch

Fabrication, setup, launch event and promotion.

H3 4. Operate and learn

Daily sales tracking and a clear go or no-go recommendation on permanent retail.

H2 Pop-ups in Hyderabad and Bangalore

High-street pockets like Jubilee Hills, Banjara Hills and Kondapur in Hyderabad, and Indiranagar, Koramangala, Jayanagar and Whitefield in Bangalore, offer very different audiences. We match location to your price point and brand personality.

H2 Frequently asked questions

H3 How long should a pop-up store run?

Launch and buzz-focused pop-ups usually run one to three days. Market-testing and seasonal pop-ups typically run two to eight weeks, which is long enough to collect reliable sales data and build repeat visits.

H3 How much does a pop-up store cost?

Costs depend on location rent, size, duration, fabrication and staffing. Modular builds keep costs down and can be reused across cities. We share options at different budgets after understanding your goals.

H3 Is a pop-up worth it for a D2C brand?

Often, yes. Pop-ups let customers touch and try products, which builds trust that is hard to create online. They also generate content, reviews and a customer list for future online marketing.

CLOSING CTA SECTION (H2 + text + buttons)

EYEBROW LABEL (<p>, not a heading): INFLUENCER CAMPAIGNS

H1

Your Audience Already Trusts Someone. Let's Make Sure They're Talking About You.

People trust creators they follow far more than they trust ads. We match your brand with the right Hyderabad and Bangalore creators, from food bloggers to tech reviewers, brief them properly, bring them to your events and measure what they actually deliver.

BUTTONS: [Plan an Influencer Campaign](#) [[See How It Works](#)]

H2

Followers are a vanity metric. Fit is everything.

A creator with 2 million followers across India may do less for your Gachibowli restaurant than five local food creators with 40,000 followers each. India's influencer marketing industry is now worth several thousand crore rupees and growing over 20% a year, which means more noise, more fake followers and more wasted budgets. We pick creators on audience location, engagement quality and past results, not follower count.

H2

What is influencer marketing?

Influencer marketing is a collaboration between a brand and content creators who have engaged audiences on platforms like Instagram and YouTube, where the creator promotes the brand through authentic content such as reviews, reels, visits or event coverage. Effective campaigns match creator audiences to the brand's buyers and track results with links and codes.

H2

What we do

H3

Creator discovery and vetting

Audience location, age, engagement authenticity and brand safety checks for every creator.

H3

Briefs and negotiation

Clear briefs that keep creators authentic while protecting your key messages, plus fair, transparent rates.

H3 Event and store visits

Creator meetups, launch invites and walk-throughs that bridge online buzz and offline footfall.

H3 Content rights and whitelisting

Usage rights to reuse creator content in your ads, often your best-performing creatives.

H3 Tracking and reporting

Unique links, discount codes and UTM tags to measure visits, sales and cost per result.

H3 Compliance

Clear disclosure (#ad, #collab) in line with ASCI influencer advertising guidelines.

H2 Our process

H3 1. Define

Goal, audience, budget and KPIs: reach, footfall, sales or app installs.

H3 2. Match

A shortlist of creators with audience data for your approval.

H3 3. Create

Briefs, content reviews and coordinated posting schedules.

H3 4. Measure

Results per creator, so the next campaign only uses the ones who delivered.

H2 Influencer marketing in Hyderabad and Bangalore

Hyderabad has a strong Telugu creator ecosystem across food, comedy, family and cinema, while Bangalore has a dense mix of Kannada, English, tech, startup, fitness and lifestyle creators. We work with nano, micro and macro creators in both cities, and in regional languages where that is where your audience lives.

H2 Frequently asked questions

H3 How do you choose the right influencers?

We check audience location, age and gender split, engagement rate, comment quality, follower authenticity, past brand work and content style. A creator is only shortlisted if their audience closely matches your actual buyers in Hyderabad, Bangalore or your target market.

H3 Are micro-influencers better than big influencers?

For local businesses and niche products, often yes. Micro-influencers (roughly 10,000 to 100,000 followers) usually have more engaged, local audiences and lower costs. Larger creators suit mass awareness and big launches.

H3 Do influencer posts need to be disclosed?

Yes. In India, ASCI guidelines require paid or gifted collaborations to be clearly disclosed with labels like #ad, #collab or #sponsored. We ensure every campaign follows these rules.

Schema (JSON-LD)	Service (serviceType: Transit Advertising) + FAQPage + BreadcrumbList

PAGE COPY

EYEBROW LABEL (<p>, not a heading): METRO BRANDING

H1 Lakhs of Commuters. Same Route. Every Single Day.

Repetition is what builds recall, and the metro delivers it like nothing else. The same professionals, students and families pass the same stations twice a day, five days a week. Metro branding turns that daily habit into brand familiarity.

BUTTONS: [Plan a Metro Campaign](#) [[See Formats](#)]

H2 The commute is the one ad slot people can't skip

Hyderabad Metro carries around 4.5 lakh passengers a day across 69 km, with Ameerpet, Miyapur, Raidurg and HITEC City among its busiest stations. Bengaluru's Namma Metro, India's second-largest network at about 96 km and 83 stations, averaged over 9 lakh riders a day in early 2026 and has crossed 10 lakh on peak days. That is a captive, largely urban, working-age audience, many of them right in the IT corridors where purchasing power is highest.

H2 What is metro branding?

Metro branding is transit advertising on a city's metro rail network, including station branding, pillar and concourse panels, digital screens, platform displays, inside-train panels and full or partial train wraps. It offers high-frequency, repeated exposure to commuters along specific routes, making it effective for building recall and targeting specific neighbourhoods and business districts.

H2 Formats we plan

H3 Station branding and naming

Concourse panels, staircases, pillars and entry gates at high-traffic stations, including co-branded station rights where available.

H3 Train wraps and inside-train panels

Full or partial exterior wraps and interior panels that travel the whole line.

H3 Digital screens

Dynamic creatives on station screens, ideal for time-sensitive offers.

H3 Station activations

Sampling, kiosks and experiential setups at stations with permissions.

H3 Pillar branding along the viaduct

Large-format visibility for road traffic below elevated lines.

H2 Our process

H3 1. Route planning

Stations and lines chosen by audience, catchment and proximity to your stores or project.

H3 2. Creative

Designs built for a three-second glance, with a clear message and QR where it works.

H3 3. Media buying

Negotiation and booking through authorised concessionaires on both networks.

H3 4. Monitoring

Installation proofs, periodic checks, QR scan tracking and footfall uplift measurement.

H2 Hyderabad Metro vs Namma Metro: which fits?

Hyderabad Metro's three corridors connect the IT hub around HITEC City and Raidurg with residential belts in Miyapur, LB Nagar and Nagole, making it strong for tech-professional and family audiences. Namma Metro's Purple, Green and Yellow lines link Whitefield, Electronic City, the CBD and major residential areas, and are especially strong for reaching Bangalore's tech workforce. Many brands run both for a two-city launch.

H2 Frequently asked questions

H3 How much does metro advertising cost in Hyderabad or Bangalore?

Costs depend on the format, number of stations, station traffic and campaign duration. A single-station panel campaign costs far less than a train wrap or multi-station takeover. We share options and rates after understanding your goals and target stations.

H3 Which metro stations are best for advertising?

For Hyderabad, high-traffic interchanges and IT corridor stations such as Ameerpet, Raidurg, HITEC City and Miyapur deliver the most footfall. In Bangalore, Majestic and stations along the Purple Line and Yellow Line serving Whitefield and Electronic City are popular. The best choice depends on where your audience lives and works.

H3 How long should a metro campaign run?

Most metro campaigns run for at least one to three months to build recall through repeated exposure. Short, high-impact bursts of two to four weeks work for launches and festive offers.

EYEBROW LABEL (<p>, not a heading): PR AND REPUTATION

H1 When Someone Googles You, or Asks ChatGPT About You, What Comes Back?

Your reputation now lives in search results, news archives, review sites and AI answers. Investors, customers, partners and future hires all check it before they trust you. We help you earn coverage that matters and make sure the story told about you is accurate, consistent and working in your favour.

BUTTONS: [Talk to Our PR Team](#) [[See What We Do](#)]

H2 PR is now part of search

AI engines like ChatGPT, Gemini and Perplexity build their answers from sources they consider trustworthy: news publications, industry sites, directories and reviews. A well-placed article does more than impress readers on the day it runs. It becomes part of the record that shapes how your brand is described for years. That makes PR one of the most powerful tools for AEO and GEO.

H2 What does a PR agency do?

A PR (public relations) agency manages how a brand or person is perceived by the public, media and stakeholders. It secures earned media coverage, writes and distributes press releases, positions founders as experts, manages crises and monitors reputation. Modern PR also strengthens search visibility and AI citations through authoritative mentions.

H2 What we do

H3 Media relations and press coverage

Story angles journalists want, pitched to the right national, regional and trade publications, including Telugu and Kannada media.

H3 Founder and executive narrative

Interviews, bylined articles, podcasts and panels that position your leaders as experts.

H3 Launch and announcement PR

Funding rounds, product launches, expansions and milestones announced with impact.

H3 Crisis communication

Prepared statements, response playbooks and rapid support when something goes wrong.

H3 Online reputation management

Review monitoring and responses, search result improvement and correcting inaccurate information.

H3 AI and search reputation

Consistent brand facts across trusted sources so Google and AI engines describe you correctly.

H2 Our process

H3 1. Audit

What media, search and AI engines currently say about you and your competitors.

H3 2. Narrative

Key messages, story angles and spokesperson preparation.

H3 3. Outreach

Targeted pitching, interviews and placements.

H3 4. Amplify and monitor

Coverage shared across your channels and monitored for sentiment and impact.

H2 PR for Hyderabad and Bangalore brands

Bangalore is India's startup capital, and its media landscape is crowded with funding news. Hyderabad is home to pharma, life sciences, IT and a fast-growing startup scene. We know which journalists, publications and regional outlets matter in each city, and how to pitch stories they actually want to run.

H2 Frequently asked questions

H3 How is PR different from advertising?

Advertising is paid space where you control the message. PR earns coverage through journalists and publications that choose to write about you, which makes it more credible. Earned media also stays searchable and is often used as a source by AI answer engines.

H3 Can you guarantee media coverage?

No ethical PR agency can guarantee editorial coverage, because journalists decide what to publish. We improve your chances significantly with strong story angles, timing and relationships, and we report every pitch and placement transparently.

H3 What is online reputation management?

Online reputation management is the monitoring and improvement of what people find about a brand or person online, including reviews, search results, social mentions and AI answers. It involves responding to reviews, publishing accurate positive content and addressing misinformation.

CLOSING CTA SECTION (H2 + text + buttons)

H2

Why Hyderabad needs a different marketing playbook

Hyderabad is two cities in one. There is the global IT city of HITEC City, Gachibowli, Kondapur and the Financial District, with young professionals who search in English, order online and compare everything. And there is the Hyderabad of Kukatpally, Dilsukhnagar, Secunderabad and the Old City, with large families, Telugu-first content and decisions made over WhatsApp. A campaign that works in one can fall flat in the other.

We plan for both, often in the same campaign.

H2

What we do for Hyderabad businesses

H3

Local SEO and Google Maps

Rank in the map pack for "near me" searches in your area, from Madhapur to Malakpet.

H3

AI search visibility

Get recommended when someone asks ChatGPT or Gemini for the best option in Hyderabad.

H3 Google and Meta ads

Pin-code and radius targeting so you only pay for customers you can actually serve.

H3 Social media and reels

Telugu and English content that feels at home in Hyderabad feeds.

H3 Websites and landing pages

Fast, SEO-ready sites built to convert local visitors into enquiries.

H3 On-ground activations

Mall, society, campus, festival, theatre and metro campaigns across the city.

H2 Industries we serve in Hyderabad

- Restaurants, cafes and cloud kitchens across Jubilee Hills, Banjara Hills, Kondapur and Gachibowli.
- Hospitals, clinics, dental and dermatology practices across the city.
- Salons, bridal studios and fashion boutiques.
- Schools, colleges and coaching institutes.
- Real estate developers in the western corridor, Kokapet, Tellapur and beyond.
- IT, SaaS, pharma and life sciences companies.

H2 Areas we cover

HITEC City, Madhapur, Gachibowli, Kondapur, Financial District, Kokapet, Narsingi, Manikonda, Jubilee Hills, Banjara Hills, Ameerpet, Begumpet, Secunderabad, Kukatpally, KPHB, Miyapur, Kompally, Uppal, LB Nagar, Dilsukhnagar, Old City and Shamshabad.

H2 Why Hyderabad businesses choose Digi Carotene

- Local roots: we live and work here, and we know the neighbourhoods, festivals and audiences.
- Data-led decisions: every recommendation comes with the number behind it.
- One team for digital, offline and PR.
- 300+ clients and 7+ years of results across industries.

H2 Frequently asked questions

H3 Which is the best digital marketing agency in Hyderabad?

The best agency is the one that understands your industry, can show real results and reports in business terms like leads and revenue. Digi Carotene is a Hyderabad-based, data-led agency with 7+ years of experience and 300+ clients, offering SEO, AI search optimisation, ads, social, web, offline activations and PR under one team.

H3 How much do digital marketing services cost in Hyderabad?

Costs depend on your goals, the channels involved and your ad budget. Small local businesses often start with a focused package such as Google Business Profile, local SEO and Meta ads, while growing brands use full-service retainers. Digi Carotene shares a fixed-scope proposal after a free audit.

H3 Do you offer services in Telugu?

Yes. We create Telugu content, captions, voiceovers, ad creatives and video scripts alongside English, because many Hyderabad audiences respond better to content in their first language.

H3 Where is your Hyderabad office?

[Full office address, landmark, Hyderabad, Telangana, PIN]. Visits are by appointment. Call or WhatsApp [phone] to book a meeting.

NOTE (do not publish)

If Digi Carotene has a real, staffed Bangalore office, add the address, map and Google Business Profile. If not, do not list an address on this page; keep the copy focused on "serving Bangalore" and the on-ground team. A virtual address risks Google Business Profile suspension.

EYEBROW LABEL (<p>, not a heading): DIGITAL MARKETING AGENCY IN BANGALORE

H1

Bengaluru Tests Everything. Your Marketing Should Too.

Bangalore buyers read reviews, compare prices, ask AI and try the free trial before they commit. Investors ask about CAC and retention before revenue. Digi Carotene brings a data-led, test-and-learn approach to Bangalore brands, with 7+ years and 300+ clients of experience behind every recommendation.

BUTTONS: [Get a Free Audit](#) [[Talk to a Strategist](#)]

H2

The most competitive digital market in India

Bangalore has more startups, more marketers and more ad spend per square kilometre than almost anywhere in India. Cost per click in categories like SaaS, edtech, healthcare and real estate is among the highest in the country. In a market like that, you do not win by spending more. You win by measuring better, testing faster and showing up where competitors are not, including AI answers and on the ground.

H2

What we do for Bangalore brands

H3

Growth and performance marketing

Google, Meta and LinkedIn campaigns with rigorous testing and CAC-focused reporting.

H3

SEO, AEO and GEO

Rank on Google and get cited by ChatGPT, Gemini and Perplexity, where Bangalore's tech-savvy buyers increasingly start.

H3 Founder branding and PR

LinkedIn presence, media coverage and thought leadership for founder-led companies.

H3 Social media and content

English and Kannada content, reels and creator collaborations that match Bangalore's humour and culture.

H3 Websites and CRO

High-performance websites and landing pages built to convert.

H3 BTL and experiential

Mall, tech park, apartment, campus and Namma Metro campaigns across the city.

H2 Who we work with in Bangalore

- Funded startups and SaaS companies along ORR, Koramangala, HSR Layout and Indiranagar.
- D2C and e-commerce brands scaling from online to offline.
- Hospitals, clinics and wellness brands.
- Real estate developers across Whitefield, Sarjapur Road, North Bangalore and Hebbal.
- Restaurants, cafes and breweries.
- Schools, colleges and edtech platforms.

H2 Areas we cover

Koramangala, Indiranagar, HSR Layout, Whitefield, Marathahalli, Bellandur, Sarjapur Road, Electronic City, BTM Layout, Jayanagar, JP Nagar, Banashankari, Basavanagudi, Malleshwaram, Rajajinagar, Hebbal, Yelahanka, MG Road, CBD and North Bangalore.

H2 Why Bangalore brands choose Digi Carotene

- A test-and-learn culture that fits how Bangalore companies already work.
- Transparent reporting in the metrics founders and boards care about.
- One team for digital, AI search, offline and PR, with no vendor juggling.
- Experience across 300+ clients, so we know which benchmarks are real.

H2 Frequently asked questions

H3 Which is the best digital marketing agency in Bangalore for startups?

Look for an agency that reports in business metrics like CAC, conversion rate and payback period, runs structured experiments and understands both brand and performance. Digi Carotene is a data-led agency serving Bangalore startups with growth marketing, performance ads, SEO and AEO, founder branding and PR.

H3 Do you have a team in Bangalore?

[If yes: Yes, our Bangalore team is based at [address].] [If no: Our strategy and digital teams work with Bangalore clients through regular video and in-person reviews, and our on-ground crew travels to Bangalore for shoots, activations and events.]

H3 Do you create Kannada content?

Yes. We create Kannada, English and Hindi content, captions and voiceovers, and work with Kannada-speaking creators where it helps your brand connect with local audiences.

H1

Marketing Insights You Can Actually Use

No fluff, no recycled listicles. Practical guides on search, AI, ads, social and on-ground marketing, written by the people running campaigns every day in Hyderabad and Bangalore.

H2

Recommended first 24 articles (topic clusters)

NOTE (do not publish)

Each article should answer the question in the first 50 words, include an author box with a real name and credentials, link to the relevant service page, and be updated at least once a year. These topics target real search and AI-prompt demand in both cities.

H3

Cluster 1: AI search (supports SEO page)

- What is AEO and GEO? A plain-English guide for business owners
- How to get your business recommended by ChatGPT in 2026
- Google AI Overviews: what they mean for your website traffic
- llms.txt explained: should your business have one?

H3

Cluster 2: Local SEO (supports SEO and city pages)

- How to rank on Google Maps in Hyderabad: a step-by-step guide
- Local SEO for Bangalore businesses: the 2026 checklist
- How to get more Google reviews without breaking the rules
- Google Business Profile mistakes that cost you customers

H3

Cluster 3: Paid ads (supports Performance and Growth)

- How much should a small business spend on Google Ads in India?
- Meta Ads vs Google Ads: which is right for your business?
- What is a good cost per lead for clinics, restaurants and real estate in Hyderabad?
- Click-to-WhatsApp ads: the complete guide for Indian businesses

H3

Cluster 4: Social and content (supports Social, Content, Insta Shoot)

- How to write reel hooks that stop the scroll

- Instagram marketing for restaurants in Hyderabad
- LinkedIn personal branding for Bangalore founders
- Telugu vs English content: which performs better in Hyderabad?

H3 Cluster 5: Offline and experiential (supports Offline pages)

- Mall activations: how to measure ROI
- Society activations in Hyderabad and Bangalore: a brand's guide
- Hyderabad Metro vs Namma Metro advertising: formats and costs explained
- Festival marketing calendar for Telangana and Karnataka

H3 Cluster 6: Websites and growth (supports Web and Growth)

- Why your website gets traffic but no enquiries
- Landing page checklist for Google and Meta ads
- WhatsApp Business API: setup, costs and use cases
- How to choose a digital marketing agency in Hyderabad or Bangalore

Reach us directly

- Phone and WhatsApp: **[+91 XXXXX XXXXX]**
- Email: **[hello@digicarotene.com]**
- Hyderabad office: **[Full address, landmark, PIN]**
- **[Bangalore: address only if a real office exists]**
- Hours: **[Monday to Saturday, 10 am to 7 pm]**

H2 What happens next

H3 1. We review your details

A strategist studies your business, website and competitors.

H3 2. A 30-minute call

We discuss your goals, challenges and what we found.

H3 3. Your plan

You receive a clear proposal with scope, timelines and the targets we will report against.

H2 Frequently asked questions

H3 Is the audit really free?

Yes. The audit and the first consultation are free and come with no obligation. You keep the findings and the action plan whether or not you work with us.

H3 Do you work with small businesses?

Yes. We work with businesses of all sizes, from single-location restaurants and clinics to multi-city brands. We recommend a scope that fits your budget and goals.

H3 Can we meet in person?

Yes. You are welcome to visit our Hyderabad office by appointment. For Bangalore clients, we arrange video calls and in-person meetings as needed.

Developer Handover: Technical SEO and AEO Checklist

H2 Critical fixes before launch

- Unique meta tags: Every page currently outputs the homepage title, description and Open Graph tags. Implement per-page title, meta description, og:title, og:description, og:url and og:image using the values in this document.
- Canonical tags: Every page currently canonicalises to <https://digicarotene.com>. Each page must have a self-referencing canonical (e.g., <https://digicarotene.com/services/digital-marketing/seo>). This is the single most damaging issue on the current build.
- Location consistency: Remove "Dubai Silicon Oasis, UAE" from any footer variant. Use one NAP (name, address, phone) site-wide that matches Google Business Profile.
- WhatsApp link: Replace wa.me/971501234567 with the real Indian number.
- Navigation: Use one label and URL for paid advertising ("Performance Marketing", </services/digital-marketing/performance-marketing>). 301-redirect </ppc> to it.
- Placeholder content: Remove "[to confirm]" case study cards, "Client 01 to 08" logos, repeated phase descriptions and the "+280%" KPI until real data replaces them.
- /services: The "Explore Our Services" button links to /services. Make sure this URL resolves (redirect to </services/digital-marketing> or create a combined services hub).

H2 Heading and HTML rules

- One H1 per page, matching the [H1] in this document.
- Eyebrow labels (e.g., "Performance Marketing" above the H1) should be <p> or , not headings.
- FAQ questions should be H3 elements under an H2 "Frequently asked questions", with answers in <p>. Do not hide answers behind JavaScript that loads only on click; render them in the HTML (an accordion with content in the DOM is fine).
- Use descriptive alt text on all images; replace "image to confirm" alt text.

H2 Structured data (JSON-LD)

- Site-wide: Organization (name, url, logo, sameAs: LinkedIn, Instagram, Facebook, YouTube, Clutch), with description "Digi Carotene is a data-led digital marketing agency based in Hyderabad, India, with 7+ years of experience and 300+ clients."
- Homepage and Contact: ProfessionalService / LocalBusiness with address, geo, telephone, openingHours and areaServed: ["Hyderabad", "Bengaluru"].
- Service pages: Service (name, serviceType, provider, areaServed) + FAQPage + BreadcrumbList.
- Blog posts: BlogPosting with author (Person) and dateModified.
- Validate everything in Google's Rich Results Test before launch.

H2 Performance

- Target LCP under 2.5s, INP under 200ms and CLS under 0.1 on mobile.

- The homepage hero loads full-width 3840px images; serve responsive sizes and AVIF/WebP, and lazy-load below-the-fold images.
- Keep motion effects from blocking rendering of text content.

H2 AI crawler access and lms.txt

- Allow GPTBot, OAI-SearchBot, PerplexityBot, Google-Extended and ClaudeBot in robots.txt unless there is a business reason not to.
- Publish /lms.txt with a short brand summary and links to key pages. Suggested starting text:

```
# Digi Carotene
> Digi Carotene is a data-led digital marketing agency based in Hyderabad, India, serving Hyderabad, Bangalore and clients worldwide. 7+ years of experience, 300+ clients. Services: SEO, AEO and GEO; performance and growth marketing; social media; content; web design; personal branding; email and WhatsApp marketing; Instagram content shoots; BTL and offline activations (mall, residential, campus, festival, theatre, metro, pop-up, corporate events, influencer campaigns); PR.

## Key pages
- Services: https://digicarotene.com/services/digital-marketing
- SEO, AEO and GEO: https://digicarotene.com/services/digital-marketing/seo
- Offline marketing: https://digicarotene.com/services/offline-marketing
- Hyderabad: https://digicarotene.com/digital-marketing-agency-hyderabad
- Bangalore: https://digicarotene.com/digital-marketing-agency-bangalore
- Contact: https://digicarotene.com/contact
```

H2 Internal linking

- Every service page links to 3 to 5 related services (listed under "Internal links" for each page) and to Contact.
- Both city pages link to all main service pages, and every service page links back to the relevant city pages from its "In Hyderabad and Bengaluru" section.
- Blog posts link to the service page in their cluster with descriptive anchor text (e.g., "our local SEO services in Hyderabad"), never "click here".

H2 Paid campaign landing page notes

- For Google Ads, send each ad group to the matching service page (or a stripped-down landing page variant with the same H1, no main navigation, form above the fold and click-to-call).
- Install GA4, Google Tag Manager, Google Ads conversion tracking, Meta Pixel and Conversions API before launch. Track form submits, WhatsApp clicks and phone clicks as separate conversions.
- Add UTM parameters to every ad and QR code so offline activations are attributable.
- Never use competitor brand names or mall, metro or cinema operator trademarks in ad text without permission.

Sources for Market Figures Used in the Copy

NOTE (do not publish)

Figures were checked in October 2026. Re-verify before publishing and update annually.

- AI Overviews reduce organic clicks by about 40%: randomized field experiment by Agarwal and Sen (SSRN, April 2026), as reported by getairefs.com and ecorpit.com.
- India has about 100 million weekly ChatGPT users, ChatGPT's second-largest market: Sam Altman, February 2026, reported by TechCrunch.
- Digital was 59% of India's ad spend in 2025 (Rs 71,621 crore), projected to near 70% by 2027: dentsu-e4m Digital Advertising Report 2026, via exchange4media.
- OOH was the only traditional medium to grow in 2025: Pitch Madison Advertising Report 2026, via exchange4media.
- Hyderabad Metro carries about 4.5 lakh passengers a day on 69 km; busiest stations include Ameerpet, Miyapur, Raidurg and HITEC City: Siasat.com, August 2026.
- Namma Metro is India's second-largest network (about 96 km, 83 stations), averaged about 9.16 lakh daily riders in April 2026, record 10.48 lakh (11 August 2025): Wikipedia (citing BMRCL) and WRI India.
- India's influencer marketing industry is worth Rs 3,000 to 3,500 crore (2025) growing about 22% a year; 93% of brands prioritise Instagram: Koflence Decoding Influence Report, May 2026.
