

Digi Carotene Website — Developer Change Requests

Oct 9, 2026 · @Sai Narasimhan Palakolanu

This is the single place for every website change handed to the developer; new changes are added as numbered change requests (CR-01, CR-02 ...) with their own spec, and the tracker shows what's pending, in progress or done.

Change tracker

One row per change; the developer updates Status, and each CR's full spec sits in its own section below.

ID	Change	Page / section	Status	Added
CR-13	"Talk to an Industry Specialist" becomes "Speak to Our Expert" and opens the Contact popup	All industry pages — Next step band	Not started	9 Oct 2026
CR-12	Write FAQs (6 per page) replacing the empty FAQ placeholder; add FAQPage schema	All industry pages + All Industries — FAQs	Not started	9 Oct 2026
CR-11	Remove the "Clients We Work With in This Sector" logo section	All industry pages	Not started	9 Oct 2026
CR-10	Every Free Growth Audit button opens the audit popup, with industry pre-selected	All industry pages + All Industries	Not started	9 Oct 2026
CR-09	"Start a conversation" opens the Contact popup (CR-07)	/about — Next step band	Not started	9 Oct 2026

ID	Change	Page / section	Status	Added
CR-08	"Where we work" replaces Bangalore with worldwide (heading, sub-label, paragraph)	/about — Where we work	Not started	9 Oct 2026
CR-07	Hero buttons moved above the fold; Meet the Team replaced by Contact Us, which opens a new Contact popup form	/about — hero	Not started	9 Oct 2026
CR-06	Final CTA button changes to "Contact Us" and links to /contact	/digital-marketing-agency-hyderabad — Next step band	Not started	9 Oct 2026
CR-05	Rewrite "What we do" around performance and growth; show all services as equal cards	/digital-marketing-agency-hyderabad — What we do	Not started	9 Oct 2026
CR-04	Move "Get a Free Growth Audit" into the hero, below the description; open the CR-01 popup	/digital-marketing-agency-hyderabad — hero	Not started	9 Oct 2026
CR-03	Replace the placeholder box with five Global Client Stories cards	/global — Global Client Stories	Not started	9 Oct 2026
CR-02	Fill or remove the placeholders still on the live site	Home + sitewide	Not started	9 Oct 2026
CR-01	"Get a Free Growth Audit" buttons open a 3-step popup form instead of /contact	Home — hero + final CTA	Not started	9 Oct 2026

How each new CR is written: ID · page and section · what changes (before → after) · exact copy or spec · how to check it's done.

CR-01 — Free Growth Audit popup form

Before: "Get a Free Growth Audit" (hero) and "Get Your Free Growth Audit" (final CTA) link to /contact. **After:** both open a 3-step popup on the same page that collects business details, the links to audit, the industry and the challenge.

Trigger and popup behaviour

Location	Button text	cta_location
Home hero	Get a Free Growth Audit	home_hero
Home final CTA band	Get Your Free Growth Audit	home_final_cta

Also opens from the Hyderabad page hero (CR-04) with `cta_location = hyderabad_hero`. Any future page that gets an audit button reuses this same popup with its own `cta_location` value.

- Opening the popup adds `#growth-audit` to the URL; `digicarotene.com/#growth-audit` opens it on page load (for ads and WhatsApp links).
- If JavaScript fails, the button falls back to `/contact?audit=1`.
- Desktop: centred modal, max width 640px, dimmed background, page scroll locked.
- Mobile (under 768px): full-screen sheet sliding up, sticky Back/Next buttons at the bottom.
- Top of popup: progress bar + "Step 1 of 3", close (×) top right. Use the site's fonts, yellow primary button and rounded cards.
- Close with ×, Esc or click outside. If anything is filled, confirm first: "Leave the audit form? Your details will be lost." — Keep filling / Leave.
- Keep typed answers in `sessionStorage` so a refresh doesn't wipe them; clear after a successful submit.

Popup copy (top of step 1)

- Heading: Get Your Free Growth Audit
- Sub-line: Tell us about your business. We'll review your website, social channels and ads, then send you the three fastest wins — free.
- Trust line: 100% free · No spam · Reply within [2 working days]

Step 1 of 3 — Tell us about your business

Label	Field name	Type	Required	Validation / options	Placeholder
Your name	full_name	Text	Yes	2-60 characters	e.g. Ravi Kumar
Business name	business_name	Text	Yes	2-80 characters	e.g. Green Leaf Café
Work email	email	Email	Yes	Valid email format	you@business.com
Phone / WhatsApp	phone + country_code	Country-code dropdown + tel	Yes	Default +91; 7-15 digits; store as E.164	98765 43210
Reach me on WhatsApp	whatsapp_ok	Checkbox	No	Ticked by default	—
Country	country	Searchable dropdown	Yes	Default India	—
City	city	Text	No	Up to 60 characters	e.g. Hyderabad
Industry	industry	Dropdown	Yes	Healthcare & Clinics · Restaurants, Cafés & QSR · Salons & Beauty · Education & Coaching · Real Estate & Furniture · D2C, Food & Retail · B2B & Technology · Fashion & Lifestyle · Events & Entertainment · Other	Select your industry
Your industry	industry_other	Text	Only if Industry = Other	2-60 characters; hidden otherwise	e.g. Interior design

Button: **Next** →

Step 2 of 3 — Where can we find you online?

Helper text: Add every link you have. At least one is needed so we know what to audit.

Label	Field name	Type	Required	Validation / options	Placeholder
Website	website_url	URL	At least one link*	Accept with or without https://; auto-add on blur	www.yourbusiness.com

Label	Field name	Type	Required	Validation / options	Placeholder
Instagram	instagram	Text	At least one link*	@handle or URL; save as https://instagram.com/handle	@yourbusiness
LinkedIn	linkedin_url	URL	At least one link*	Must contain linkedin.com/company/ or linkedin.com/in/	linkedin.com/company/yourbusiness
YouTube	youtube_url	Text	At least one link*	@handle or URL; save as https://youtube.com/@handle	@yourchannel
Google Business Profile (recommended for local businesses)	gbp_url	URL	No	Google Maps / g.page / share.google link	Paste your Google Maps link
Are you running ads right now?	ads_running	Multi-select chips	Yes	Meta (Facebook/Instagram) · Google · YouTube · LinkedIn · Not running ads	—

*At least one of Website, Instagram, LinkedIn or YouTube is required. "Not running ads" un-ticks the other chips.

Buttons: [← Back](#) · [Next →](#)

Step 3 of 3 — What's holding your growth back?

Label	Field name	Type	Required	Validation / options	Placeholder
Main goal	goal	Single-select chips	Yes	More leads & enquiries · More online sales · Lower ad costs · More walk-ins / footfall · Brand awareness · Something else	—
The challenge you're facing	challenge	Textarea (5 rows)	Yes	20–1,000 characters; live counter	e.g. We spend ₹50,000 a month on Instagram ads but get very few quality leads.

Label	Field name	Type	Required	Validation / options	Placeholder
Monthly marketing budget	budget	Dropdown	No	India: Under ₹25,000 · ₹25,000–50,000 · ₹50,000–1 lakh · ₹1–3 lakh · ₹3 lakh+ · Not sure yet. Other countries: Under \$500 · \$500–1,000 · \$1,000–3,000 · \$3,000–10,000 · \$10,000+ · Not sure yet	Select a range
Consent	consent	Checkbox	Yes	Must be ticked	I agree to Digi Carotene contacting me about my audit. [Privacy Policy]

Buttons: [← Back](#) · [Get My Free Audit](#) (spinner + disabled while sending)

Hidden fields: cta_location · page_url · referrer · utm_source · utm_medium · utm_campaign · utm_term · utm_content · gclid · fbclid · device · submitted_at (IST). Read UTMs from the landing URL and keep them in sessionStorage.

Error messages

Situation	Message (under the field)
Required field empty	Please fill this in.
Email invalid	Please enter a valid email, like name@business.com.
Phone invalid	Please enter a valid phone number.
URL invalid	This doesn't look like a link. Please check it.
No audit link given	Add at least one link so we know what to audit.
Challenge too short	Tell us a little more (at least 20 characters).
Consent not ticked	Please agree so we can contact you.
Server / network error	Something went wrong. Please try again, or WhatsApp us at [number].

Show errors when the visitor leaves a field or presses Next, not while typing; move focus to the first error.

After submit

Thank-you screen (inside the popup, no redirect)

- Green tick · Heading: Thanks, {first name}! Your audit request is in.
- Body: Our team will review your {links given} and send your free growth audit within [2 working days] by {WhatsApp / email}.
- Buttons: **Chat on WhatsApp now** (wa.me/[number], pre-filled: "Hi Digi Carotene, I just requested a free growth audit for {business_name}.") · **Explore our services** (/services) · Close

Where each submission goes

Destination	What happens
Team email	To [audits inbox]; subject "New Growth Audit: {business_name} — {industry} — {city}, {country}"
CRM	New lead, source "Website - Growth Audit", with UTM fields
Google Sheet	One row per submission, as backup
WhatsApp alert (optional)	Short alert to the sales number

Auto-reply to the visitor: Subject "We've received your growth audit request, {first name}". Body: Hi {first name}, thanks for asking us to review {business_name}. Our strategists will look at your {links} and send your audit within [2 working days]. Want to talk sooner? Reply to this email or WhatsApp us at [number]. — Team Digi Carotene

Spam and data: Cloudflare Turnstile or reCAPTCHA v3 · hidden honeypot field `company_fax` (drop if filled) · max 3 submissions per IP per hour · server-side validation · HTTPS only · consent line links to the Privacy Policy.

Tracking

Moment	GA4 event	Parameters	Ads pixels
Popup opens	<code>audit_form_open</code>	<code>cta_location</code>	—

Moment	GA4 event	Parameters	Ads pixels
Step 1 done	audit_step_complete	step: 1, industry, country	—
Step 2 done	audit_step_complete	step: 2, links_count	—
Submitted	generate_lead (key event)	cta_location, industry, goal, budget	Meta Pixel Lead + Conversions API; Google Ads conversion
Closed without submit	audit_form_abandon	last_step	—
Validation error	audit_form_error	field, step	—

Fire ad conversions only after the server confirms. Never send name, email or phone to GA4.

Accessibility: visible labels tied to inputs · focus moves into the popup, stays trapped, returns to the button on close · `role="dialog"`, `aria-modal="true"`, errors via `aria-live` · chips work with Tab/Space/Enter.

Done when

- ☐ Both home buttons open the popup; neither goes to /contact
- ☐ /#growth-audit opens the popup on load
- ☐ Next is blocked until that step's required fields are valid
- ☐ "Other" industry shows and hides the extra field
- ☐ Zero audit links shows the error
- ☐ Instagram and YouTube @handles save as full URLs
- ☐ Budget switches to USD when country isn't India
- ☐ Thank-you screen shows first name and their links
- ☐ Team email, CRM/Sheet row and auto-reply arrive with UTM values
- ☐ Refresh mid-form keeps answers; after submit the form starts empty
- ☐ Works on iPhone Safari, Android Chrome, desktop Chrome/Safari/Edge

- ☐ GA4 DebugView shows every event; Meta Events Manager shows the Lead

CR-02 — Placeholders still on the live site

The live build checked on 9 Oct 2026 still has 10 open items; content for each will be added here as it's ready, and the developer swaps it in.

#	Where	What's there now	What's needed	Content from
1	Home — FAQ	5 of 6 questions have no answer text (performance vs growth, services, clients outside India, cost, location)	Answers written into the HTML, visible to Google, plus FAQ schema	Content team — answers already drafted in the website content doc
2	Home — "Results that speak volumes"	Figures like -66%, 8.5x, 5x labelled "modelled from industry data"	Real client results with approval, or remove the numbers	Content team
3	Home — "Campaign visuals, activations..."	6 placeholder images, note "placeholders until campaign assets are confirmed"	Real campaign photos with descriptive alt text	Studio / content team
4	Home — "Content people actually stop to watch"	Raw file paths showing (e.g. /assets/reels/sorshe.mp4) instead of videos	Embed the reels: muted autoplay, lazy-loaded, poster image	Developer (files exist)
5	Home — client logo strip	17 logos repeated 4 times in the page code	Render the set once and loop it with CSS so screen readers and Google don't see duplicates	Developer

#	Where	What's there now	What's needed	Content from
6	Sitewide — phone / WhatsApp	Footer shows +91 99598 20874; WhatsApp links use +91 93986 82206	One confirmed number everywhere	Owner to confirm
7	Sitewide — internal links	Links point to digi-carotene-com.vercel.app while canonical is digicarotene.com	Relative links; set the Vercel preview to noindex	Developer
8	Sitewide — Resources menu	"Free GEO & AEO Scan"	Rename to "Free Growth Audit" and open the CR-01 popup, if approved	Owner to confirm
9	/global — "Global Client Stories"	Dashed box: "Named global case stories publish here once clients approve metrics and logos"	Now covered by CR-03	Content team
10	Page head	Empty <code>meta-next-size-adjust</code> tag	Remove the empty tag	Developer

Story card format for /global (item 9)

Each card: country flag + country · industry · client name (or an anonymised descriptor if not approved, e.g. "Enterprise software company, Texas") · one-line challenge · 2-3 services used (linked) · one result line · "Read the story" link to the full case study. If no number is approved, use a factual scope line instead (e.g. "LinkedIn content, sales decks and website revamp, delivered across US time zones").

CR-03 — Global Client Stories on /global

Before: a dashed box saying "Named global case stories publish here once clients approve metrics and logos." **After:** five story cards from real international clients, in the order below (performance and lead-generation work first). Numbers in [brackets] are optional: publish a card without its result number until the client approves one.

Section copy

- Eyebrow: PROOF · STORIES (keep)
- H2: Global Client Stories (keep)
- Intro: From a 4,500-seat arena in New York to SAP and SaaS companies in Texas and California, here's how we help brands outside India find customers and grow.
- Remove the dashed placeholder box.

Card layout

Each card: flag + location · industry tag · client name + logo (with permission) · card headline · challenge (1 line) · what we did (1–2 lines) · service chips (linked) · result line · "Visit their site ↗" link. Grid: 3 cards per row on desktop, 1 on mobile.

The five cards

1. LECOM Event Center — Elmira, New York, USA

- Industry: Live events & entertainment venue
- Headline: Selling more tickets for a 4,500-seat arena
- Challenge: Filling seats for concerts, sports nights and family shows at a multi-purpose arena in downtown Elmira.
- What we did: Planned and ran Meta (Facebook and Instagram) ad campaigns for each event to drive ticket sales.
- Services: Performance Marketing → </services/digital-marketing/performance-marketing>
- Result: [X tickets sold / X× return on ad spend across X events]
- Link: lecomeventcenter.com

2. iServiceGlobe — Houston, Texas, USA

- Industry: SAP IT services (B2B)
- Headline: 120 sales-qualified leads in 3 months for an SAP services firm
- Challenge: Reaching enterprise decision-makers who buy SAP implementation and support.
- What we did: Designed and built the website, then ran email marketing and LinkedIn marketing campaigns to generate leads for their SAP services.
- Services: Web Design & Development · Email Marketing · Growth Marketing (LinkedIn)
- Result: 2× more leads and 120 sales-qualified leads in 3 months

- Link: iserviceglobe.com

3. Indellia — Palo Alto, California, USA

- Industry: B2B SaaS — customer feedback analytics for consumer brands
- Headline: SEO and LinkedIn lead generation for a Silicon Valley SaaS platform
- Challenge: Building a steady pipeline of consumer-brand buyers for an AI-driven voice-of-customer platform.
- What we did: Ongoing SEO to grow organic visibility, plus LinkedIn lead generation targeting decision-makers at consumer brands.
- Services: Search Engine Optimization · Growth Marketing (LinkedIn)
- Result: [X% growth in organic traffic / X qualified leads]
- Link: indellia.com

4. Amatha Green Energy — Denmark & India

- Industry: Energy technology platform
- Headline: A website for an India-focused energy platform, run from Denmark
- Challenge: An NRI founder based in Denmark needed a website to introduce a platform connecting global energy-technology vendors with India's industrial market.
- What we did: Designed and developed the website, working remotely across time zones.
- Services: Web Design & Development
- Result: Website launched [month year]
- Link: amatha.in

5. Diocleziano Ltd — Europe

- Industry: Advertising display equipment
- Headline: A product website for a European display-equipment supplier
- Challenge: Presenting poster carts and LED gobo projectors clearly to business buyers.
- What we did: Designed and built the company website.
- Services: Web Design & Development
- Result: Website launched [month year]
- Link: diocleziano.com

Also use this on the page

- Markets strip above the stories: USA · Europe · Denmark · India
- Each card can link to a full case study later (/case-studies/<client-slug>) once written.

Done when

- ☐ Dashed placeholder box removed
- ☐ Five cards live, in the order above, with working service and site links
- ☐ Client logos used only where the client has approved
- ☐ No result number published unless approved; bracketed numbers hidden if empty

CR-04 — Hyderabad page: audit button above the fold

Page: /digital-marketing-agency-hyderabad

Before: the "Get a Free Audit" button sits alone in a separate band below the yellow hero, so visitors don't see it until they scroll, and it doesn't open the audit form. **After:** the button sits inside the hero, directly below the description paragraph, and opens the same Growth Audit popup as the home page (CR-01).

What to change

- Move the button into the yellow hero, under the paragraph ending "...measured in enquiries, footfall and revenue." Leave 32px space above it.
- Button text: **Get a Free Growth Audit** → (same wording as the home page).
- Add a second button beside it: **Chat on WhatsApp** (outline style, same as the home hero), linking to the confirmed WhatsApp number.
- On the yellow background, keep the primary button readable: dark text on a white or deep-yellow fill with a visible border; check contrast is at least 4.5:1.
- Mobile: buttons stack full-width, primary on top, both visible without scrolling on a 375 × 667 screen.
- Remove the old standalone button band below the hero so there's no empty gap.
- Clicking opens the CR-01 popup with `cta_location = hyderabad_hero`. Reuse the same popup component; don't build a second form.

Done when

- ☐ Button is visible in the hero without scrolling on desktop and mobile

- ☐ It opens the Growth Audit popup, not /contact
- ☐ Submissions from this page arrive with `cta_location = hyderabad_hero`
- ☐ Old button band below the hero is gone

CR-05 — Hyderabad page: "What we do" rewritten around performance and growth

Page: /digital-marketing-agency-hyderabad — section "What we do for Hyderabad businesses"

Before: six cards led by Local SEO and AI search; performance and growth marketing, the core of the business, don't appear by name. **After:** the section opens with how we choose the right mix for each business, then shows every service as an equal card, with Performance Marketing and Growth Marketing first. Offline and PR follow as two smaller cards.

Section copy

- Eyebrow: WHAT WE DO · LOCAL + DIGITAL (keep)
- H2: What We Do for Hyderabad Businesses
- Intro: We don't sell fixed packages. We first study your business model — who buys, how they decide, what a customer is worth — then pick the services from our list that will grow it fastest, and report every month in leads and revenue.

"How we pick your mix" strip (3 small steps above the cards)

1. **Understand your business model** — customers, margins, sales cycle and what's working today.
2. **Choose the right services** — only the channels that fit your goals and budget.
3. **Measure in leads and revenue** — cost per lead, ROAS and repeat customers, reported monthly.

Service cards (equal size, 3 per row on desktop, 1 on mobile)

#	Card title	Card copy	Link
1	Performance Marketing	Google, Meta, YouTube and LinkedIn ads built around cost per lead and ROAS, targeted to the Hyderabad areas you serve.	/services/digital-marketing/performance-marketing
2	Growth Marketing	Funnel fixes, WhatsApp follow-ups, offers and referral programs that make every customer cheaper to win and quicker to return.	/services/digital-marketing/growth-marketing
3	Social Media Marketing	Reels, content calendars and community management in Telugu and English that turn followers into bookings.	/services/digital-marketing/social
4	SEO, Google Maps & AI Search	Rank in the map pack for "near me" searches from Madhapur to Malakpet, and get named when people ask ChatGPT or Gemini.	/services/digital-marketing/seo
5	Content Marketing	Website copy, blogs and video scripts that answer what Hyderabad customers ask before they buy.	/services/digital-marketing/content
6	Web Design & Development	Fast, mobile-first websites and landing pages built to convert ad and search traffic into enquiries.	/services/digital-marketing/web

#	Card title	Card copy	Link
7	Graphic Designing	Brand identity, ad creatives and social designs that stop the scroll.	/services/digital-marketing/graphic-design
8	Personal Branding	Founders, doctors and experts positioned as the trusted name in their field.	/services/digital-marketing/personal-branding
9	WhatsApp & Email Marketing	Automated reminders, broadcasts and journeys that bring customers back.	/services/digital-marketing/whatsapp-marketing
10	Insta Shoot	In-house photo and reel shoots at your outlet, anywhere in Hyderabad.	/services/digital-marketing/insta-shoot

Below the grid, two smaller cards side by side:

Card title	Card copy	Link
BTL Activations	Mall, society, campus and festival activations measured with QR, WhatsApp and offer codes.	/services/offline-marketing
PR & Reputation	Media coverage, Google review growth and reputation management that build trust.	/services/pr

Under the cards: **Get a Free Growth Audit →** (opens the CR-01 popup, `cta_location = hyderabad_services`).

Done when

- ☐ Performance Marketing and Growth Marketing are the first two cards
- ☐ All 10 digital service cards are the same size; offline and PR sit below as two smaller cards
- ☐ Every card links to its service page

- ☐ The "How we pick your mix" strip appears above the cards
- ☐ The button under the cards opens the audit popup

CR-06 — Hyderabad page: final CTA goes to Contact Us

Page: /digital-marketing-agency-hyderabad — "Next step" band at the bottom ("Ready to grow in Hyderabad?")

Before: button reads "Get a Free Audit →". **After:** button reads **Contact Us →** and links to /contact (a normal link, not the audit popup).

- Keep the eyebrow "NEXT STEP", the heading "Ready to grow in Hyderabad?" and the yellow button style as they are.
- Use a relative link (/contact), not the vercel.app address.
- Tracking: GA4 event `cta_click` with `cta_location = hyderabad_final_cta`.

Done when

- ☐ Button text is "Contact Us"
- ☐ Clicking it opens /contact on the same tab

CR-07 — About page: hero buttons + Contact Us popup form

Page: /about — hero ("We Are Not Here to Make Marketing Look Busy. We Are Here to Make It Pay.")

Before: "Work With Us" and "Meet the Team" sit in a separate band below the yellow hero, out of view until the visitor scrolls. **After:** two buttons inside the hero, directly below the description: **Work With Us →** (primary) and **Contact Us** (secondary, outline). "Meet the Team" is removed. Contact Us opens a new, short Contact popup form.

Hero buttons

Button	Style	Action	cta_location
Work With Us →	Primary (yellow fill / white on yellow hero, visible border)	Opens the Growth Audit popup (CR-01)	<code>about_hero</code>

Button	Style	Action	cta_location
Contact Us	Secondary (outline)	Opens the Contact popup (below)	about_hero_contact

- Place both 32px below the description; side by side on desktop, stacked full-width on mobile, both visible without scrolling on a 375 × 667 screen.
- Remove the old button band below the hero so there's no empty gap.
- Team page stays reachable from the About menu.

Contact popup form (new, single step)

Same modal shell as CR-01 (centred on desktop, full-screen sheet on mobile, × / Esc / click-outside to close, focus trap), but one short step. Build it as a reusable component so any "Contact Us" button can open it later; opening adds `#contact` to the URL.

- Heading: Let's Talk
- Sub-line: Tell us what you need and we'll get back to you within [1 working day].

Label	Field name	Type	Required	Validation / options	Placeholder
Your name	full_name	Text	Yes	2-60 characters	e.g. Ravi Kumar
Email	email	Email	Yes	Valid email format	you@business.com
Phone / WhatsApp	phone + country_code	Country-code dropdown + tel	Yes	Default +91; 7-15 digits; store as E.164	98765 43210
Company / business name	business_name	Text	No	Up to 80 characters	e.g. Green Leaf Café
How can we help?	enquiry_type	Dropdown	Yes	Start a new project · Get a quote · Free growth audit · Partnership · Careers · Something else	Select one
Message	message	Textarea (4 rows)	Yes	10-1,000 characters; live counter	Tell us a little about your business and goals

Label	Field name	Type	Required	Validation / options	Placeholder
Consent	consent	Checkbox	Yes	Must be ticked	I agree to Digi Carotene contacting me. [Privacy Policy]

- Button: **Send Message** (spinner + disabled while sending).
- If "Free growth audit" is chosen, show a small link under the dropdown: "Want a detailed audit? Use our audit form →" (opens the CR-01 popup).
- Hidden fields, error messages, spam protection and sessionStorage handling: same as CR-01.

Thank-you state (inside the popup): Thanks, {first name}! We've got your message and will reply within [1 working day]. Buttons: **Chat on WhatsApp now** · Close.

Where it goes: email to [contact inbox], subject "New enquiry: {enquiry_type} — {full_name}"; same CRM / Google Sheet as CR-01 with source "Website - Contact popup"; auto-reply to the visitor confirming receipt. Careers enquiries go to [careers inbox] instead.

Tracking: `contact_form_open (cta_location) · generate_lead with form_type = contact and enquiry_type · Meta Pixel Contact · contact_form_abandon`.

Done when

- ☐ Both buttons sit inside the hero, below the description, visible without scrolling
- ☐ "Meet the Team" button is gone; old button band removed
- ☐ Work With Us opens the Growth Audit popup with `cta_location = about_hero`
- ☐ Contact Us opens the Contact popup; /about#contact opens it on load
- ☐ Submissions reach the right inbox (careers separately) and the CRM/Sheet
- ☐ Thank-you state and auto-reply work; GA4 and Meta events fire

CR-08 — About page: "Where we work" says worldwide, not Bangalore

Page: /about — section "Where we work"

Before → After

Element	Before	After
Eyebrow	WHERE WE WORK	WHERE WE WORK (keep)
Sub-label	HYDERABAD · BANGALORE · GLOBAL	HYDERABAD · ACROSS INDIA · WORLDWIDE
Heading	Home in Hyderabad. Reach across Bangalore.	Home in Hyderabad. Reach Worldwide.
Paragraph	Our home is Hyderabad, from Hitech City to Dilsukhnagar. We also run campaigns for brands across Bangalore — from Koramangala startups to Whitefield retail — and serve clients in other countries remotely.	Our home is Hyderabad, from Hitech City to Dilsukhnagar. From here we grow brands across India and around the world — from a 4,500-seat arena in New York and SAP and SaaS companies in Texas and California to businesses in Europe and Denmark — working across time zones with one dedicated team.

- If the section has location links or cards, use: Hyderabad → /digital-marketing-agency-hyderabad · Worldwide → /global.

Done when

- ☐ No mention of Bangalore in this section
- ☐ Heading, sub-label and paragraph match the After column

CR-09 — About page: "Start a conversation" opens the Contact popup

Page: /about — "Next step" band at the bottom ("Want to see if this fits your brand?")

Before: "Start a conversation →" links away to the contact page. **After:** the same button opens the Contact popup form built in CR-07, on the same page.

- Keep the eyebrow, heading, button text and yellow style as they are.
- `cta_location = about_final_cta`.
- Fallback if JavaScript fails: link to /contact.

Done when

- ☐ Clicking "Start a conversation" opens the Contact popup, not a new page
- ☐ Submissions arrive with `cta_location = about_final_cta`

CR-10 — All industry pages: Free Growth Audit buttons open the audit popup

Pages: every page under the Industries menu, plus the All Industries page.

Before: "Get a Free Growth Audit" buttons on industry pages link to /contact. **After:** every "Get a Free Growth Audit" button on these pages (hero, mid-page and final CTA) opens the same Growth Audit popup as the home page (CR-01). Reuse the one popup component.

Pre-fill the industry

When the popup opens from an industry page, Step 1's Industry dropdown is pre-selected to match that page. The visitor can still change it.

Industry page	Pre-selected industry	cta_location (add _hero , _mid or _final for the button)
Healthcare & Clinics	Healthcare & Clinics	<code>industry_healthcare</code>
Restaurants & QSR	Restaurants, Cafés & QSR	<code>industry_restaurants</code>
Salons & Beauty	Salons & Beauty	<code>industry_salons</code>
Education	Education & Coaching	<code>industry_education</code>
Real Estate & Furniture	Real Estate & Furniture	<code>industry_real_estate</code>
D2C & Retail	D2C, Food & Retail	<code>industry_d2c_retail</code>
B2B & Technology	B2B & Technology	<code>industry_b2b_tech</code>
All Industries	None (visitor picks)	<code>industry_hub</code>

Example: the hero button on the Healthcare page sends `cta_location = industry_healthcare_hero`.

- Any new industry page added later follows the same rule.
- Fallback if JavaScript fails: link to `/contact?audit=1`.

Done when

- ☐ Every "Get a Free Growth Audit" button on all 8 pages opens the popup, not `/contact`
- ☐ Industry is pre-selected correctly on each page and can be changed
- ☐ Submissions arrive with the right `cta_location` for page and button

CR-11 — All industry pages: remove the "Clients We Work With in This Sector" section

Pages: every page under the Industries menu, plus the All Industries page if it has the same section.

Before: a "CLIENTS · PROOF — Clients We Work With in This Sector" section with a row of six client logos (the same set shows on every industry page, e.g. Bikanervala, Veda Hospitals, Flavours of Andhra, CotAndCouch, Sorshe). **After:** the whole section is removed — eyebrow, heading, sub-line and logo row.

- Close the gap so the section above runs straight into the next one, with normal section spacing.
- Don't remove the client logos from the home page or the Clients page; this applies to industry pages only.

Done when

- ☐ The clients section no longer appears on any industry page
- ☐ No empty space left where it was
- ☐ Home page and Clients page logos are unchanged

CR-12 — FAQs for all industry pages

Pages: all 7 industry pages + All Industries. The FAQ section is currently empty: it shows a developer note and a dashed placeholder box. Replace both with the questions below.

Layout rules (all pages)

- Eyebrow FAQs · QUESTIONS (keep). Replace the H2 "FAQs" with the page-specific H2 below.
- Replace the sub-line "Answers stay visible in the HTML and pair with FAQPage schema at launch." (a build note, not visitor copy) with the page-specific sub-line below.
- Accordion: first question open by default. Answers must be in the page HTML even when collapsed (not loaded on click), so Google and AI search can read them.
- Add FAQPage JSON-LD on each page using exactly the same question and answer text.
- Replace the dashed box with: **Still have a question?** WhatsApp us or [Contact Us] — we reply within one working day. "Contact Us" opens the Contact popup (CR-07).

Healthcare & Clinics

H2: Healthcare Marketing in Hyderabad — **FAQs Sub-line:** Straight answers for hospitals, clinics and doctors in Hyderabad.

How do hospitals and clinics in Hyderabad get more patients online? Most patients start with Google. We optimise your Google Business Profile for each location and doctor, build treatment-and-area pages (for example, "orthopaedic doctor in Kondapur"), run Google Search ads on high-intent searches, and use WhatsApp for appointment booking. Every campaign is tracked in appointment calls and bookings, not clicks.

Is it legal for doctors and hospitals to advertise in India? Yes, within the National Medical Commission's rules. NMC's ethical advertising guidelines (issued 6 October 2026) allow factual information on services, facilities, accreditation and fees, but prohibit patient testimonials, before-and-after photos, "guaranteed cure" claims, bought reviews or followers, and discounts used to induce consultations. We plan every campaign inside these rules.

How do you charge for healthcare marketing? We charge a fixed monthly fee for an agreed scope, and ad spend is paid separately to Google or Meta. We never charge per patient, per appointment or per procedure — NMC's guidelines bar agency payments linked to patient procurement, and fixed pricing keeps your practice compliant.

How can my clinic rank on Google Maps for "near me" searches? Complete and verify your Google Business Profile with the right category, consistent address and phone everywhere, real photos, regular posts and genuine patient reviews collected ethically.

Add a page on your website for each location and specialty. Clinics usually see Maps improvements within two to three months.

Do you run ads for specialties like dermatology, dental, IVF and orthopaedics? Yes.

Google and Meta both have their own healthcare advertising policies, including limits on targeting people by health condition and on how certain treatments can be promoted. We write ads and landing pages that meet those policies and NMC rules, so campaigns get approved and stay live.

How long does healthcare marketing take to show results? Search ads can bring appointment enquiries within the first few weeks. Google Maps visibility usually improves in two to three months, and organic rankings for competitive specialties typically take four to six months. You get a monthly report on calls, bookings and cost per appointment.

Restaurants & QSR

H2: Restaurant Marketing in Hyderabad — FAQs **Sub-line:** What restaurant, café and QSR owners in Hyderabad ask us most.

How can restaurants in Hyderabad get more footfall and orders? Combine four things: a strong Google Maps listing, Instagram reels of your signature dishes, Meta ads targeted to people within a few kilometres of your outlet, and WhatsApp offers to past customers. We track results through calls, direction requests, offer-code redemptions and online orders.

Does Instagram marketing work for restaurants? Yes — food is one of the most shared categories on Instagram. Reels of signature dishes, kitchen moments and happy tables, shot by our in-house studio, work best. We pair them with geo-targeted ads so the right people nearby see them, and reuse the content on Google Maps.

Should we spend on Swiggy and Zomato ads or our own channels? Both have a role. Aggregator ads drive delivery volume but every order carries a commission. Your own channels — Google Maps, Instagram, a WhatsApp customer list and direct ordering — build repeat customers at a lower cost per order. We help you balance the two.

How do you promote a new restaurant opening in Hyderabad? We start four to six weeks before opening: teaser content, a Google Business Profile ready on day one, a preview night with local food creators, geo-targeted launch ads and an opening offer. After launch, we push reviews and repeat-visit offers to keep momentum.

Can you plan campaigns around Hyderabad festivals and events? Yes. Hyderabad's calendar is a big opportunity — Ramzan and the haleem season, Bonalu, Bathukamma, Sankranti, Diwali, Christmas, New Year and big cricket nights. We plan menus, offers and content around these dates months in advance.

How do you measure restaurant marketing results? By what reaches your till: footfall from offer codes and QR scans, table reservations, online orders, Google Maps calls and direction requests, and cost per order. You get a simple monthly report showing which channel brought which customers.

Salons & Beauty

H2: Salon Marketing in Hyderabad — FAQs Sub-line: Answers for salon, spa and beauty brands across Hyderabad.

How do salons in Hyderabad get more bookings? The fastest route is click-to-WhatsApp ads targeted to your area, backed by an Instagram feed of real transformations and a well-reviewed Google Business Profile. Visitors message you on WhatsApp, and we help your team convert those chats into confirmed appointments.

Do you work with franchise salon outlets? Yes. We run outlet-level marketing within the parent brand's guidelines: a separate Google Business Profile for each outlet, ads targeted to that outlet's neighbourhood, local offers and outlet-specific content, so each location builds its own customer base.

What content works best for salons on Instagram? Transformation reels (with client consent), stylist introductions, trend explainers, bridal looks and quick hair or skin tips perform best. We create content in Telugu and English and shoot it at your salon with our in-house studio team.

How do you bring clients back for repeat visits? Through WhatsApp reminders timed to each service, membership and package offers, birthday and anniversary messages, and rebooking prompts after each visit. Repeat clients cost far less to win than new ones, so we build this into every salon plan.

How do you market for the wedding season? We plan bridal campaigns ahead of the main Telugu wedding muhurtham dates: bridal and pre-bridal packages, portfolio shoots, Instagram ads targeted to brides-to-be and families, and WhatsApp follow-ups for trial bookings.

How quickly will we see more bookings? Click-to-WhatsApp campaigns usually start bringing enquiries in the first week or two. Google Maps and Instagram growth build over two to three months. You get monthly numbers on enquiries, bookings and cost per booking.

Education

H2: Education Marketing in Hyderabad — FAQs **Sub-line:** For colleges, schools and coaching institutes in Hyderabad.

How can colleges and coaching institutes in Hyderabad get more admissions? Build a clear admissions funnel: a strong page for every program, Google Search ads on course-and-city searches, Meta and YouTube campaigns for awareness, and lead forms connected to counsellors on WhatsApp. We track enquiries, counselling calls, applications and admissions.

When should an admissions campaign start? Awareness should start two to three months before decisions are made, and lead generation should peak around entrance results and counselling — for example, the TG EAPCET cycle for engineering. We map your campaign calendar to your intake dates.

Do you target parents as well as students? Yes. Students and parents look for different things, so we run separate messages and channels: Instagram and YouTube with student-focused content, and Facebook, Google and WhatsApp with fee, safety, faculty and placement information for parents.

How do you improve the quality of admission leads? We add qualifying questions to forms (course, qualification, location), send traffic to program-specific landing pages, follow up within minutes on WhatsApp and track every lead in a CRM, so counsellors spend time on serious applicants.

Can you run campus and school activations? Yes. We organise school outreach, college fest sponsorships, workshops and campus booths, and connect them to digital follow-up through QR codes and WhatsApp, so on-ground interest turns into trackable leads.

Are there rules for education advertising? Yes. Under the Advertising Standards Council of India (ASCI) code, claims such as placement records, rankings or results must be truthful and backed by evidence. We help you present achievements accurately so ads stay compliant and build trust with parents.

Real Estate & Furniture

H2: Real Estate & Furniture Marketing in Hyderabad — FAQs **Sub-line:** For developers, brokers and furniture showrooms in Hyderabad.

How do real estate developers in Hyderabad generate quality leads? We combine Google Search ads on project and locality searches (such as Kokapet, Tellapur or Kompally), Meta lead ads with qualifying questions, a landing page for each project and fast WhatsApp follow-up to book site visits. We report on site visits and bookings, not just form fills.

Do real estate ads in Telangana need a RERA number? Yes. Ads for a project must carry its TG RERA registration number, and marketing an unregistered project is not allowed. TG RERA has fined developers for both. We add the registration number and required details to every ad, landing page and brochure.

How do you reduce fake or low-quality property leads? We use higher-intent forms with budget and timeline questions, phone verification, retargeting of people who already engaged, and quick qualification calls or WhatsApp chats. This cuts junk leads and lowers your cost per site visit.

How can furniture showrooms in Hyderabad get more walk-ins? A strong Google Maps listing, Instagram reels and product shoots of your best pieces, ads targeted to nearby homeowners and new apartment communities, and a WhatsApp catalogue for quick enquiries. Offer codes help us measure which ads bring people into the showroom.

Do you shoot property walkthroughs and product videos? Yes. Our in-house studio shoots property walkthroughs, show flats, amenities and furniture collections, and edits them into reels, ads and website videos.

Can you reach NRI buyers outside India? Yes. We run campaigns targeting Hyderabad's diaspora in the US, UK, Gulf and other markets, with landing pages, video tours and follow-ups timed for their time zones.

D2C & Retail

H2: D2C & Retail Marketing in Hyderabad — FAQs **Sub-line:** For product brands, home-grown labels and retail stores.

How can a Hyderabad D2C brand grow online sales? With a conversion-ready store, Meta ads and Google Shopping or Performance Max campaigns, steady creative testing, and retention through WhatsApp and email. We measure revenue, return on ad spend and repeat purchase rate — not just traffic.

Should we build on Shopify or WooCommerce? Both work. Shopify is quicker to launch and easier to manage; WooCommerce offers more control and suits brands already on WordPress. We recommend one after looking at your catalogue, budget and team, and we build on both.

Should we sell on marketplaces or our own website? Usually both. Marketplaces like Amazon and Flipkart bring volume and trust; your own website keeps customer data, better margins and repeat buyers. We help you price and promote across both without them competing.

How do you lower customer acquisition cost? By testing creatives and offers every week, retargeting visitors who didn't buy, improving the checkout, and bringing first-time buyers back through WhatsApp and email. Each repeat purchase lowers your average cost to win a customer.

Do you also market physical retail stores? Yes. For stores we focus on Google Maps, ads targeted to nearby shoppers, in-store offers tracked with codes, and pop-ups or mall activations that drive footfall.

Do you do product photography and videos? Yes. Our in-house studio shoots product photos, lifestyle images and reels for your website, marketplaces and ads.

B2B & Technology

H2: B2B & Technology Marketing — FAQs **Sub-line:** For SaaS, IT services and B2B companies in Hyderabad and worldwide.

How do B2B and tech companies generate qualified leads? By reaching the right decision-makers repeatedly: LinkedIn ads and outreach to specific roles and companies, SEO and content that answers buyers' questions, email nurture sequences, and Google Search ads on solution keywords. We report on sales-qualified leads and pipeline, not impressions.

Does LinkedIn marketing work for B2B companies? Yes, when it's targeted. We combine founder and company content, LinkedIn ads aimed at job titles and industries, and personalised outreach. This builds familiarity first, so sales conversations start warmer.

Do you work with B2B companies outside India? Yes. We work with technology and services companies in the US and Europe — including SAP services and SaaS firms — from our Hyderabad team, with overlap hours in your time zone. See our Global Client Stories.

How do you measure B2B marketing results? We track the whole funnel: leads, marketing-qualified leads, sales-qualified leads, meetings booked and pipeline value, connected to your CRM where possible. That shows which channels create revenue, not just traffic.

Can you get our company recommended by ChatGPT and other AI tools? We improve your chances. AI tools recommend vendors they can verify across many trusted sources, so we publish clear, factual content about what you do, earn mentions on industry sites and keep your company details consistent everywhere.

Do you redesign B2B websites and sales decks? Yes. We build fast, clear websites designed to turn visitors into enquiries, and sales decks your team can use in pitches. Both are written to explain complex offerings simply.

All Industries

H2: Industry Marketing FAQs **Sub-line:** How we work across sectors in Hyderabad and worldwide.

Which industries does Digi Carotene work with? We work with healthcare, restaurants and QSR, salons and beauty, education, real estate and furniture, D2C and retail, B2B and technology, and more — for businesses in Hyderabad, across India and abroad.

Do you have fixed packages for each industry? No. We first study your business model — who buys, how they decide and what a customer is worth — then choose the services that will grow it fastest, from performance and growth marketing to social, SEO, web and offline activations.

My industry isn't listed. Can you still help? Yes. The same approach works across sectors. Tell us about your business in a free growth audit and we'll show you where growth is leaking and what we'd do first.

Do you understand industry rules for advertising? Yes. We plan campaigns within the rules that apply to your sector — such as NMC guidelines for healthcare, TG RERA requirements for real estate and ASCI's code for all advertisers — along with Google's and Meta's own ad policies.

How do we get started? Request a free growth audit. We review your website, social channels and ads, then share the three fastest wins for your business.

CR-13 — All industry pages: "Speak to Our Expert" opens the Contact popup

Pages: every page under the Industries menu — yellow "Next step" band near the bottom.

Before → After

Element	Before	After
Eye brow	NEXT STEP	NEXT STEP (keep)
Heading	Talk to our {Industry} specialists	Speak to our {Industry} experts
Button	Talk to an Industry Specialist → (links to /contact)	Speak to Our Expert → — opens the Contact popup (CR-07)

Example heading on the Healthcare page: "Speak to our Healthcare & Clinics experts".

- Keep the dark button style on the yellow band.
- Reuse the CR-07 Contact popup; don't build a new form.
- Send the page's industry as a hidden field `industry` (same values as the CR-10 table), so the team knows which sector the enquiry came from.
- `cta_location = industry_<slug>_expert` (e.g. `industry_healthcare_expert`).
- Fallback if JavaScript fails: link to /contact.

Done when

- ☐ Button reads "Speak to Our Expert" on all industry pages
- ☐ Heading uses "experts" instead of "specialists"
- ☐ Clicking opens the Contact popup, not a new page
- ☐ Submissions include the page's `industry` and `cta_location`

Details the developer needs from us

- ☐ One confirmed phone / WhatsApp number for the whole site
- ☐ Inbox that receives growth audit requests
- ☐ CRM in use, or Google Sheet only
- ☐ Reply promise shown in the popup (currently 2 working days)
- ☐ Final Privacy Policy URL

- ☐ Go / no-go on renaming "Free GEO & AEO Scan" to "Free Growth Audit"
- ☐ Approved client results, campaign photos and global stories (CR-02 items 2, 3, 9)
